**RE: County of Los Angeles' October 1, 2025, Regional Planning
Commission Meeting – Agenda Item No. 6 (File No. 25-190) –
Entrada South and Valencia Commerce Center Project (Project
Nos. 00-210-(5) and 87-150-(5)) – Final Supplemental
Environmental Impact Report (SCH# 2000011025)**

Dear Chair Louie, Honorable Commissioners, and Jodie Sackett,

On behalf of the Western States Regional Council of Carpenters (“**Western States Carpenters**” or “**WSRCC**”), our firm is submitting these comments in connection with the County of Los Angeles’ (“**County**”) October 1, 2025, Regional Planning Commission hearing concerning the Entrada South Project (“**Entrada South**”) and Valencia Commerce Center Project (“**VCC**”; hereinafter, collectively, the “**Project**”) and the Final Supplemental Environmental Impact Report (“**Final SEIR**”) prepared in connection therewith.

According to the SEIR, the Project as currently proposed involves changes and adjustments to the development of the Entrada South and Valencia Commerce Center Planning Areas that were subject to the State-certified EIR for the Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan (“RMDP/SCP”), which was certified in June 2017 by CDFW. (SEIR, p. 1.0-1.) The Project Site is located within the planning boundary of the RMDP/SCP, and the current SEIR for the Project purports to focus upon incremental changes at the Project Site

since the 2017 approval of the RMDP/SCP project, changes in circumstances, and any new information that has become available since the prior EIR. (SEIR, pp. 2.0-2 – 3.) The Project, as modified, proposes development of 1,574 residential units and 730,000 square feet of commercial and/or office uses in the Entrada South Planning Area (amounting to a reduction of 151 residential units and an increase of 280,000 square feet of non-residential floor area relative to the project set forth in the State-certified 2017 EIR). (SEIR, pp. 2.0-4 2.0-16.) The Entrada South Planning Area of the Project would also maintain a 27.2-acre Spineflower Preserve, a 5.4-acre public neighborhood park, a potential school site, recreational centers totaling approximately 8,430 square feet, and approximately 140.4 acres of open space. (SEIR, p. 2.0-4.) The plans for the Valencia Commerce Center would remain largely unchanged from the prior EIR, but would add measures to increase environmental protections and reduce impacts to the neighboring Hasley Creek and Castaic Creek. (SEIR, p. 2.0-18)

The Western States Carpenters is a labor union representing over 90,000 union carpenters in 12 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects. Individual members of the Western States Carpenters live, work, and recreate in the County and surrounding communities and would be directly affected by the Project's environmental impacts.

WSRCC expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

WSRCC incorporates by reference all comments related to the Project or its CEQA review, including the SEIR and the prior Environmental Impact Report for the RMDP/SCP. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, WSRCC requests that the County provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code

Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE COUNTY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The County should require the Project to be built by contractors who participate in a Joint Labor-Management Apprenticeship Program approved by the State of California and make a commitment to hiring a local workforce.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California's workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at*

Furthermore, workforce policies have significant environmental benefits given that they improve an area's jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that the "[u]se of a local state-certified apprenticeship program" can result in air pollutant reductions.²

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? *Journal of the American Planning Association* 72 (4), 475-490, 482, *available at* <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The County should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE COUNTY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁵

The Western States Carpenters recommend that the County adopt additional requirements to mitigate public health risks from the Project's construction activities. The Western States Carpenters requests that the County require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

In particular, based upon the Western States Carpenters' experience with safe construction site work practices, the Western States Carpenters recommends that the County require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.

- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health

Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The County should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

The Western States Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁷

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The County should require the Project to be built using a workforce trained in ICRA protocols.

III. THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

CEQA is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”), § 15002, subd. (a)(1).⁸ At its core, its purpose is to

⁶ See also The Center for Construction Research and Training, North America’s Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S. Construction Sites, *available at* https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, *available at* https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

⁷ For details concerning the Western States Carpenters’ ICRA training program, *see* <https://icrahealthcare.com/>.

⁸ The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Pub. Res. Code, § 21083. The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

“inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made. Thus, the EIR ‘protects not only the environment but also informed self-government[.]’” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564 (internal citation omitted).

To achieve this purpose, CEQA mandates preparation of an Environmental Impact Report (“**EIR**”) for projects so that the foreseeable impacts of pursuing the project can be understood and weighed. *Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80. The EIR requirement “is the heart of CEQA.” CEQA Guidelines, § 15003(a).

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Commissioners of the City of Oakland* (2001) 91 Cal.App.4th 1344, 1354; *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 400. The Environmental Impact Report (EIR) serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to “identify ways that environmental damage can be avoided or significantly reduced.” CEQA Guidelines, § 15002, subd. (a)(2).

A public agency must prepare an EIR whenever substantial evidence supports a “fair argument” that a proposed project “may have a significant effect on the environment.” Pub. Res. Code, §§ 21100, 21151; CEQA Guidelines, §§ 15002, subds. (f)(1)-(2), 15063; *No Oil, supra*, 13 Cal.App.3d at p. 75; *Communities for a Better Environment v. California Resources Agency* (2002) 103 Cal.App.4th 98, 111-112. If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns” specified in Public Resources Code section 21081. See CEQA Guidelines, §§ 15092, subds. (b)(2)(A)-(B).

Essentially, should a lead agency be presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect. CEQA Guidelines, §§ 15064(f)(1)-(2); see *No Oil, supra*, 13 Cal.App.3d at p. 75 (internal citations and quotations omitted). Substantial evidence includes “enough relevant information and reasonable inferences from this information

that a fair argument can be made to support a conclusion, even though other conclusions might also be reached.” CEQA Guidelines, § 15384, subd. (a).

The EIR has been described as “an environmental ‘alarm bell’ whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return.” *Berkeley Keep Jets Over the Bay v. Bd. of Port Comm’rs.* (2001) 91 Cal. App. 4th 1344, 1354 (“*Berkeley Jets*”); *County of Inyo v. Yorty* (1973) 32 Cal. App. 3d 795, 810.

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR’s function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the “fair argument” standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602; *Friends of “B” St. v. City of Hayward* (1980) 106 Cal.3d 988, 1002.

Further, it is the duty of the lead agency, not the public, to conduct the proper environmental studies. “The agency should not be allowed to hide behind its own failure to gather relevant data.” *Sundstrom, supra*, 202 Cal.App.3d at p. 311. “Deficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences.” *Ibid*; see also *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, 1382 (lack of study enlarges the scope of the fair argument which may be made based on the limited facts in the record).

Thus, refusal to complete recommended studies lowers the already low threshold to establish a fair argument. The court may not exercise its independent judgment on the

omitted material by determining whether the ultimate decision of the lead agency would have been affected had the law been followed. *Environmental Protection Information Center v. Cal. Dept. of Forestry* (2008) 44 Cal.4th 459, 486 (internal citations and quotations omitted). The remedy for this deficiency would be for the trial court to issue a writ of mandate. *Ibid.*

While the courts review an EIR using an ‘abuse of discretion’ standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Keep Jets, supra*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights, supra*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Ibid.* Drawing this line and determining whether the EIR complies with CEQA’s information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the First District Court of Appeal has previously stated, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. *Berkeley Keep Jets, supra*, 91 Cal.App.4th at p. 1355 (internal quotations omitted).

Both the review for failure to follow CEQA’s procedures and the fair argument test are questions of law, thus, the de novo standard of review applies. *Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 435. Whether the agency’s record contains substantial evidence that would support a fair argument that the project may have a significant effect on the environment is treated as a question of law. *Consolidated Irrigation Dist., supra*, 204 Cal.App.4th at p. 207; Kostka and Zischke, *Practice Under the Environmental Quality Act* (2017, 2d ed.) at § 6.76.

Section 15088.5(a) of the CEQA Guidelines provides that an EIR must be recirculated whenever there is disclosure of significant new information. Significant new information includes: (1) disclosure of a new significant environmental impact resulting from the project or from a new proposed mitigation measure; (2) disclosure of a substantial increase in the severity of an environmental impact unless mitigation measures are adopted that reduce the impact to a level of insignificance; and (3) disclosure of a feasible project alternative or mitigation measure considerably different from others previously analyzed which would clearly lessen the significant

environmental impacts of the project which the project proponents decline to adopt. *Id.*

Additionally, an EIR must be recirculated when it is so fundamentally inadequate and conclusory in nature that meaningful public review and comment is precluded. *Id.* [citing *Mountain Lion Coalition v. Fish & Game Com.* (1989) 214 Cal.App.3d 1043].

Here, as discussed below, the SEIR fails to substantiate all of its conclusions to allow meaningful public review and comment, provide adequate mitigation measures, and fully assess all pertinent environmental factors. Accordingly, this comment letter discloses significant new information, necessitating revision and recirculation of the SEIR.

IV. THE SEIR IS INADEQUATE UNDER CEQA AND SHOULD BE REVISED AND RECIRCULATED

A. The SEIR Fails to Include an Adequate Project Description of the Modified Project

The SEIR for the Project must be recirculated because it lacks an adequate Project description with regard to the significant expansion of commercial development in the Entrada South planning area. “[A]n accurate, stable and finite project description is the sine qua non of an informative and legally sufficient” environmental document. *County of Inyo v. City of Los Angeles* (1977) 71 Cal. App. 3d 185, 200. “A curtailed or distorted project description may stultify the objectives of the reporting process” as an accurate, stable and finite project description is necessary to allow “affected outsiders and public decision-makers balance the proposal's benefit against its environmental cost, consider mitigation measures, assess the advantage of terminating the proposal (i.e., the "no project" alternative) and weigh other alternatives in the balance. *Id.* at 192 – 93.

CEQA Guidelines § 15124 requires a project to be described in enough detail to allow for evaluation of its potential environmental impacts: (a) the project’s precise location and boundaries; (b) a clearly written statement of objectives sought by the proposed project; (c) a description of the project’s technical, economic, and environmental characteristics; and (d) a statement describing a list of agencies, permits, and approval which the project expects to use.

The SEIR notes that the Project as modified from the prior State-certified EIR includes a reduction of 151 residential units and an increase in commercial square footage of 280,000 sq. ft. (from 450,000 sq. ft. to 730,000 sq. ft.) for the Entrada

South planning area. See Final SEIR, p. 3.0-3, Table 3.0-1. In this regard, the modified Project would increase the commercial development in the Entrada South planning area by over 50% from the project that was previously studied and approved in the State-certified EIR. Meanwhile, the current Draft SEIR and Final SEIR for the Project contain no description whatsoever regarding the nature and type of this anticipated additional commercial development, and only vaguely refers to the anticipated commercial development as “including but not limited to office, retail, hotel, and other allowable non-residential commercial and business park uses...” See Final SEIR, p. 3.0-20.

Simply put, the Project’s description with regard to the change in its anticipated commercial floor area development does not satisfy CEQA’s project description requirement. Indeed, 280,000 sq. ft. of additional development is equivalent to greater than 6.4 acres in additional commercial floor area to be developed. For the sake of comparison, in the context of other development projects within the state of California, 6+ acres of commercial floor area development is routinely subject to its own independent CEQA review. Here, however, the SEIR simply bypasses the specifics of the additional commercial development being contemplated by the modified Project, as well as any associated analysis of the additional impacts resulting from the conversion of the original Project’s previously-approved residential floor area into the undefined commercial uses of the modified Project.

Moreover, the SEIR for the Project provides no statement of objectives for the additional commercial floor area to be developed. Final SEIR, p. 3.0-40 – 41. Indeed, the Final SEIR is wholly silent on with regard to the “additional specific objectives of the for the Modified Project” in the context of the additional commercial development being pursued. *Id.* Thus, the Project description in the SEIR provides no specific information regarding precisely what the Project aims to achieve in the context of the additional commercial development in the Entrada South planning area or whether there is any need for such development and facilities. To that end, the County and its decisionmakers, and the general public, have been left completely in the dark regarding the additional commercial development that would occur under the modified Project, and the SEIR has not been revised to account for this change in the Project, which, in turn, renders large swaths of its study and analysis of environmental impacts deficient with respect to the Entrada South planning area. Further, the SEIR provides no description of the Project’s technical, economic, and environmental

characteristics with respect to the Project’s expansion of its commercial development, thereby further failing to satisfy the CEQA Guidelines. *Id.*

Accordingly, the SEIR must be revised and recirculated to provide a specific description of the additional commercial development being proposed for the Project’s Entrada South Planning Area and to provide adequate study and analysis of any changes that will result in the impacts analysis for the Project based upon the significant expansion of commercial development in the modified Project.

B. The SEIR Fails to Support Its Findings with Substantial Evidence

CEQA requires that an EIR identify and discuss the significant effects of a Project, how those significant effects can be mitigated or avoided. CEQA Guidelines § 15126.2; PRC §§ 21100(b)(1), 21002.1(a). If a project has a significant effect on the environment, an agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns.” CEQA Guidelines § 15092(b)(2) (A–B). Such findings must be supported by substantial evidence. CEQA Guidelines § 15091(b).

When new information is brought to light showing that an impact previously discussed in the EIR but found to be insignificant with or without mitigation in the EIR’s analysis has the potential for a significant environmental impact supported by substantial evidence, the EIR must consider and resolve the conflict in the evidence. See *Visalia Retail, L.P. v. City of Visalia* (2018) 20 Cal.App.5th 1, 13, 17; see also *Protect the Historic Amador Waterways v. Amador Water Agency* (2004) 116 Cal. App. 4th 1099, 1109. While a lead agency has discretion to formulate standards for determining significance and the need for mitigation measures—the choice of any standards or thresholds of significance must be “based to the extent possible on scientific and factual data and an exercise of reasoned judgment based on substantial evidence. CEQA Guidelines § 15064(b); *Cleveland Nat’l Forest Found. v. San Diego Ass’n of Gov’ts* (2017) 3 Cal. App. 5th 497, 515; *Mission Bay Alliance v. Office of Community Inv. & Infrastructure* (2016) 6 Cal. App. 5th 160, 206. And when there is evidence that an impact could be significant, an EIR cannot adopt a contrary finding without providing an adequate explanation along with supporting evidence. *East Sacramento Partnership for a Livable City v. City of Sacramento* (2016) 5 Cal. App. 5th 281, 302.

In addition, a determination that regulatory compliance will be sufficient to prevent significant adverse impacts must be based on a project-specific analysis of potential impacts and the effect of regulatory compliance. In *Californians for Alternatives to Toxics v. Department of Food & Agric.* (2005) 136 Cal. App. 4th 1, the court set aside an EIR for a statewide crop disease control plan because it did not include an evaluation of the risks to the environment and human health from the proposed program but simply presumed that no adverse impacts would occur from use of pesticides in accordance with the registration and labeling program of the California Department of Pesticide Regulation. See also *Ebbetts Pass Forest Watch v Department of Forestry & Fire Protection* (2008) 43 Cal. App. 4th 936, 956 (the fact that Department of Pesticide Regulation had assessed environmental effects of certain herbicides in general did not excuse failure to assess effects of their use for specific timber harvesting project).

Here, for the reasons discussed in detail below, the SEIR fails to comply with the foregoing requirements.

1. The SEIR Fails to Adequately Analyze and Mitigate Air Quality Impacts

A fundamental purpose of an EIR is to identify ways in which a proposed project's significant environmental impacts can be mitigated or avoided. Pub. Res. Code §§ 21002.1(a), 21061. To implement this statutory purpose, an EIR must describe any feasible mitigation measures that can minimize the project's significant environmental effects. PRC §§ 21002.1(a), 21100(b)(3); CEQA Guidelines §§ 15121(a), 15126.4(a).

If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” PRC §§ 21002; 21002.1, 21081; CEQA Guidelines §§ 15091, 15092(b)(2)(A); and find that ‘specific overriding economic, legal, social, technology or other benefits of the project outweigh the significant effects on the environment.” PRC §§ 21002; 21002.1, 21081; CEQA Guidelines §§ 15091, 15092(b)(2)(B). “A gloomy forecast of environmental degradation is of little or no value without pragmatic, concrete means to minimize the impacts and restore ecological equilibrium.” *Environmental Council of Sacramento v. City of Sacramento* (2006) 142 Cal.App.4th 1018, 1039.

According to CEQA Guidelines, “[w]hen an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any

feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment.” CEQA Guidelines Section 15096(g)(2). As previously noted, the SEIR reaffirms the prior conclusion from the State-certified EIR that the Project will have significant and unavoidable construction and operational Air Quality impacts. (SEIR, pp. 2.0-27 – 28.)

However, WSRCC reiterates that an impact can only be labeled as significant-and-unavoidable after all available, feasible mitigation is considered and the SEIR lacks substantial evidence to support a finding that no other feasible mitigation existed to mitigate Project’s significant impacts. Here, the SEIR offers no new mitigation measures to ameliorate the significant anticipated air quality impacts, and relies only on the Project’s anticipated regulatory compliance and seven assorted Project Design Features (“PDFs”) in reaching the conclusion that the Project will result in no substantial increase in the severity of the Air Quality impacts. (SEIR at pp. 5.1-37 – 39.)

Given the current anticipated air quality impacts of the Project are considered substantial and unavoidable, and that the Project appears to be relying upon compliance with current regulations and PDFs for the proposition that its Air Quality impacts are not anticipated to increase beyond those identified in the State-certified EIR, the SEIR should be presenting an analysis of the baseline of the Project’s Air Quality impacts before incorporating of the mitigating effects of regulation and PDFs in its conclusions. In this way, the SEIR’s analysis would better reveal the nature and extent of the mitigating effect of these measures, such that it will allow the County and the general public to better ascertain if additional mitigation measures would have an appreciable effect on the Air Quality impacts. In its response to comment letters raising concerns regarding air quality issues, the Final SEIR claims that the Draft SEIR already included a detailed analysis of air quality and is supported by an expert technical report, so recirculation of the Draft SEIR is not required. However, the Final SEIR still sets forth no baseline analysis of the Project’s air quality impacts independent of the inclusion and incorporation of the anticipated regulatory compliance and PDFs, and further fails to provide adequate justification for why such baseline analysis was not completed. This baseline analysis of the Project’s air quality impacts is required under CEQA in order to compare the impact the Project will have on air quality relative to the air quality if the Project were not completed, and further,

to assess the nature and extent of any mitigating effects on air quality impacts that would result from the Project's regulatory compliance and incorporation of the prescribed PDFs.

Further, the Final SEIR did not adequately address the concern raised in another comment that failure to include and analyze reasonably foreseeable incorporation of backup generators in the Project results in an underestimation of the Project's reasonably foreseeable air quality impacts. The County simply responded to the comment by indicating that there are not new or substantially more severe significant impacts compared to the 2017 Project, and that the comment raised speculative impacts. This does not directly address this issue. Thus, at a minimum, the SEIR should be revised and recirculated to adjust its analysis and consider whether any additional Air Quality mitigation measures would be feasible and effective in reducing the Project's anticipated significant impacts.

Moreover, and in addition to its lack of requisite and appropriate analysis, the SEIR currently fails to incorporate any and all feasible mitigation and fails to adopt enforceable mitigation measures. A mitigation measure must be enforceable through conditions of approval, contracts or other means that are legally binding. (PRC § 21081.6; CEQA Guidelines § 15126.4(a)(2).) Mitigation measures should be implemented, not adopted and ignored (*Federation of Hillside & Canyon Ass'ns v. City of Los Angeles* (2000) 83 Cal.App.4th 1252, 1261.) The Final SEIR states that the Mitigation Monitoring and Reporting Program (MMRP) is fully enforceable and legally binding on the Modified Project and is subject to the review and enforcement authority of the County of LA. However, this response in the Final SEIR fails to address the fact that the Project's PDFs are not actual mitigation measures and will not be subject to the same level of enforceability and commitment to mitigation that would result from implementation of a bona fide mitigation measure.

As previously raised by WSRCC, given that the Project Site sits in a region that remains in non-attainment for multiple state and national air quality standards, WSRCC agrees with the SEIR that the air quality impacts of the Project will be significant and unavoidable regardless of the mitigation measures ultimately undertaken. However, the Project and its SEIR still have an obligation to reduce those additional air quality impacts to the greatest extent feasible via appropriately crafted mitigation measures. Indeed, the pollutants for which the Project's air quality impacts will be significant are fine particulate matter and ozone, among other pollutants,

which the Final SEIR notes have serious impacts on human health. Further, the Clean Air Act requires a demonstration of reasonable progress towards attainment and the incorporation of additional sanctions for failure to attain or meet interim standards, requiring that these pollutants and their impact on air quality be addressed. Just because the emissions are reduced in the Modified Project compared to the 2017 Project does not sufficiently address the concern of the region remaining in non-attainment and the fact that the Project, as presently proposed, will still contribute to and exacerbate that existing non-attainment status. WSRCC reiterates that the County must revise the SEIR to commit to holding the Project to the essential standard of reducing air quality impacts to the greatest extent feasible using appropriately crafted mitigation measures.

2. The SEIR Fails to Adequately Analyze and Mitigate Wildfire Impacts

In its prior comments, WSRCC raised the issue that the SEIR's analysis of Wildfire Impacts is deficient, in that it references Project Design Features ("PDFs") as the only new measures aimed at offsetting the Project's wildfires impacts/risks (SEIR, pp. ES-42) and it relies entirely on those PDFs and the Project's purported regulatory compliance. Despite the Final SEIR's efforts to summarily dismiss WSRCC's comments on the issue of the Project's wildfire impacts, this deficiency in the SEIR remains particularly prominent given the significant and unavoidable cumulative wildfire impacts identified for the Project by the prior State-certified EIR. In the wake of the recent catastrophic wildfires in Southern California, including but not limited to the Palisades Fire and Eaton Fire, as well as the Hurst Fire, the Castaic Fire, and the Lidia Fire that were located in and around the Santa Clarita Valley, the SEIR's analysis of wildfire risk and implementation of mitigation measures to mitigate that risk falls well short. Indeed, the disastrous level of devastation wrought by Palisades and Eaton fires that occurred earlier this year resulted primarily from several contributing factors that included the placement of significant residential and urban development adjacent to expansive fire-prone wildlands and the existence of high-capacity power lines transecting said fire-prone wildlands (which are characteristics shared by the Project proposed here).

The Draft SEIR 5.14 Wildfire acknowledges on Page 5.14-39 that in 2025, "the Hughes Fire burned approximately 2 to 4 miles north of the VCC Planning Area", highlighting the need for detailed analysis of and a plan to address wildfire risks for

the Project. At a minimum, the SEIR must conduct a genuine and thorough analysis of the wildfire risks attendant to the Project Site without the prior incorporation and inclusion of the PDFs in that analysis. Indeed, the Project Site and its surrounding areas are well known to be at extremely high risk for wildfires and have been officially designated as a Very High Fire Hazard Severity Zone (“**VHFHSZ**”) by the State subsequent to the certification of the prior State-certified EIR for the Project (a notable change in circumstances). As such, the Final SEIR’s analysis of Wildfire Impacts remains deficient, as it does not adequately present and assess the very real dangers of wildfires on the local landscape and then set forth appropriate *mitigation measures* to ameliorate those risks to the greatest extent possible.

The Final SEIR responded to WSRCC’s comments on this issue by indicating that the Draft SEIR and the Fire Protection Plan include discussions and analysis of mitigation measures beyond the PDFs. However, these are insufficient to address the significant and unavoidable impact that operation of the Project will have on wildfire risks. The SEIR relies upon PDFs in lieu of mitigation measures for the Project’s wildfire impacts, and this is improper particularly given the significant and unavoidable cumulative wildfire impacts that have already been acknowledged under Threshold 5.14-2 in the Section Revised Draft SEIR 2.0 Executive Summary. The PDFs address on-site fire risks but must be coupled with mitigation measures, rather than being the primary method by which the County addresses the wildfire impacts of the project. There are only two applicable mitigation measures from the state-certified EIR provided in Revised Draft SEIR 5.14 Wildfire on Page 5.14-85. The Final SEIR thus improperly dismissed WSRCC’s arguments regarding the improper use of PDFs in the face of significant and unavoidable wildfire impacts since additional mitigation measures are required.

Moreover, the Final SEIR inaccurately states and concludes that the Entrada South planning area component of the Project is surrounded by developed areas. However, there are thousands of acres of undeveloped wildlands directly west-southwest of the Entrada South planning area, such that any wildfire occurring in that area would have a direct pathway to the Entrada South project area. The SEIR does not appear to include any study or analysis of the potential impacts of that specific risk of wildfire exposure to the Entrada South planning area, relying instead on an inaccurate conclusory determination that the planning area is surrounded by other development. Further, the Final SEIR’s Revised SEIR 5.14 Wildfire section acknowledges on Page

5.14-33 that the southeastern corner of the Entrada South Planning Area is dedicated to a 29.17-acre Spineflower Preserve, which is an area that will be maintained as undeveloped for critical environmental protection. The Wildland Fire Evacuation Plan is insufficient to address the fire hazard to which the site is subject by being surrounded on several sides by undeveloped areas, because there are no measures to address the proximity to undeveloped land and the risk, impacts, and dangers this poses. Indeed, the plan itself states that “the Modified Project is surrounded by existi[s]ing development and infrastructure and located in a relatively high-density area” (See Revised Draft SEIR Appendix 5.14a – Fire Protection Plan, p. 115), which is a grossly inaccurate characterization of the Project area. Thus, there must be additional analysis and measures taken to address these risks and adequately address the Project’s wildfire risk.

The Final SEIR revisions commenting on the history of the Hughes Fire and noting that the project is in a VHFHSZ, as designated by the California Department of Forestry and Fire Protection, sits in stark contrast with the SEIR’s unsupported conclusion that the project site is surrounded by developed land uses in an effort to downplay the fire hazard to which the Project site is subject. From the map provided on Page 5.14-48 of the Final SEIR’s Revised Draft Section 5.14 Wildfire and the discussion above, it is clear there are large swaths of undeveloped vegetation on multiple sides of the Project. This acknowledgment of fire hazards and significant and unavoidable cumulative wildfire impacts for the Project, in addition to the recognition of recent wildfires and their impacts, necessitates additional action be taken by the County to comply with CEQA. The change on the Fire Hazard map designation subsequent to the state-certified EIR is significant new information that give rise to the County’s obligation under CEQA to conduct new, more detailed analysis of the Project’s potential wildfire impacts and underscores the need for the implementation of further mitigation measures for the Project.

C. The SEIR Improperly Mischaracterizes Mitigation Measures as “Project Design Features”

In this instance, the SEIR improperly recasts a wide array of mitigation measures as “Project Design Features” or “PDFs.” Relying on the extensive list of PDFs for the Project, the SEIR then concludes in many instances that the Project’s impacts are less than significant, and that no further mitigation is required.

However, it is established that “[a]voidance, minimization and / or mitigation measure’ . . . are not ‘part of the project.’ . . . compressing the analysis of impacts and mitigation measures into a single issue . . . disregards the requirements of CEQA.” (*Lotus v. Department of Transportation* (2014) 223 Cal. App. 4th 645, 656.)

When “an agency decides to incorporate mitigation measures into its significance determination, and relies on those mitigation measures to determine that no significant effects will occur, that agency must treat those measures as though there were adopted following a finding of significance.” (*Lotus, supra*, 223 Cal. App. 4th at 652 [citing CEQA Guidelines § 15091(a)(1) and Cal. Public Resources Code § 21081(a)(1).])

By mischaracterizing mitigation measures as PDFs, the County violates CEQA by failing to disclose “the analytic route that the agency took from the evidence to its findings.” Cal. Public Resources Code § 21081.5; CEQA Guidelines § 15093; *Village Laguna of Laguna Beach, Inc. v. Board of Supervisors* (1982) 134 Cal. App. 3d 1022, 1035 [quoting *Topanga Assn for a Scenic Community v. County of Los Angeles* (1974) 11 Cal. 3d 506, 515.]

Specifically, the SEIR delineates the following twenty-two (22) distinct PDFs to be applied to the project, all of which are tantamount to mitigation measures under CEQA:

Regarding Air Quality Impacts:

ES/VCC-PDF-AQ-1 through ES/VCC-PDF-AQ-7.

(SEIR at pp. 5.1-38 – 39.)

Regarding Biological Resources Impacts:

ES-PDF-BIO-1;

VCC-PDF-BIO-1;

VCC-PDF-BIO-2;

RMDP/SCP-AEA-PDF-3-1;

RMDP/SCP-AEA-PDF-3-8;

RMDP/SCP-AEA-PDF-3-11; and

RMDP/SCP-AEA-PDF-3-12.

(SEIR at pp. 5.2-63 – 65.)

Regarding Transportation Impacts:

ES/VCC-PDF-TR-1.

(SEIR at pp. 5.9-25 – 26.)

Regarding Wildfire Impacts:

PDF-WF-1 through PDF-WF-7.

(SEIR at pp. 5.15-49 – 53.)

Notably, the October 7, 2021 Initial Study (“IS”) for the Project determined that the Project presented potentially significant environmental impacts for a variety of environmental factors, including but not limited to the following: Air Quality, Biological Resources, Cultural Resources, Hazards/Hazardous Materials, Hydrology/Water Quality, Land Use/Planning, Noise, Public Services, Transportation, Tribal Cultural Resources, Utilities/Services, Wildfire, and Mandatory Findings of Significance. (Appendix 1a to SEIR, IS at pp. 25, 42, 44-45, 49, 72, 74, 76-80, 82, 86, 91, 98, 100, 102-103, and 104-106.) Fast-forwarding to the publication of the Project’s SEIR, the SEIR then determines that the Project would have either no new significant impact or no substantial increase in severity of impact for Air Quality, Biological Resources, Transportation, and Wildfire. According to the SEIR, the once-potentially significant additional impacts for each of these environmental factors have purportedly been cured, either in whole or in part, via the incorporation of the Project’s so-called PDFs.

By way of example, WSRCC reiterates deploying Tier 4 construction equipment to reduce impacts to air quality (per ES/VCC-PDF-AQ-2) is not a bona fide feature of “project design.” (SEIR, p. 5.1-38.) The offering of a conservation easement over preserved streambeds and riparian areas within Unnamed Canyon 2, Castaic Creek, and Hasley Canyon to reduce the Project’s biological resources impacts (per ES-PDF-BIO-1 and VCC-PDF-BIO-1) is not a bona fide feature of “project design.” The applicant’s future preparation and submission of a Construction Traffic Management Plan for the Project (per ES/VCC-PDF-TR-1) is not a bona fide feature of “project design.” (SEIR, p. 5.9-25.) And, to be sure, the applicant’s future preparation of a Construction Fire Prevention Plan for the Project (per PDF-WF-1) and the required annual completion of vegetation management within the Project’s Fuel Modification

Zones and common areas (per PDF-WF-3) is not a bona fide feature of “project design.” Rather, these are actually bona fide mitigation measures for the Project that the SEIR has attempted to disguise as PDFs in order to support the County’s improper and inaccurate determinations that, in multiple respects, Project presents “no new significant impact” and/or “no substantial increase in severity of impact.” The Final SEIR summarily dismisses WSRCC’s comments on this critical issue, claiming that, because the PDFs have been written into the MMRP, they are adequate. In this regard, the Final SEIR improperly disregards the core point of WSRCC’s objection to the use of PDFs in lieu of mitigation measures – namely, the SEIR’s baseline analysis and findings regarding the Project’s impacts have been corrupted by its inclusion of these PDFs before reaching a conclusion on the nature and extent of the Project’s impacts.

The PDFs cited above are but a handful of examples of the myriad instances of the SEIR’s mislabeling of the Project’s mitigation measures as PDFs. Indeed, mere cursory review of the SEIR reveals that the bulk of the items on the foregoing non-exclusive list of proposed PDFs for the Project amount to nothing more than an attempt to re-label what are, in fact, mitigation measures for the Project. In turn, the SEIR then premises its analysis regarding the allegedly “no new significant impact” and/or “no substantial increase in severity of impact” in the areas of Air Quality, Biological Resources, Transportation, and Wildfire on the incorporation of the so-called PDFs. To that end, WSRCC re-submits that the impacts analysis put forth in the SEIR remains demonstrably tainted and flawed by the improper application of the Project PDFs.

By affirming the recasting of Project’s mitigation measures in this manner, the Final SEIR perpetuates the SEIR’s improper attempts to skirt its responsibilities to fully analyze the Project’s various environmental impacts implicated by the PDFs. Such an attempt to evade accountability for addressing the Project’s environmental impacts directly violates CEQA, and the SEIR cannot permissibly be certified unless and until this deficiency is rectified.

V. CONCLUSION

Based on the foregoing concerns, the County should require revision and recirculation of the SEIR for the Project pursuant to CEQA. Absent doing so, the SEIR in its current

form directly violates CEQA in multiple respects. If the County should have any questions or concerns, please do not hesitate to contact this office.

Sincerely,

Jeremy Herwitt

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ "California Emissions Estimator Model." CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² "California Emissions Estimator Model." CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ "CalEEMod User's Guide." CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i) _n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the location and urbanization selected on the project characteristic screen. These values were supplied by the air districts or use a default average for the state. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

¹¹ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

**Re: Comment on Environmental Impact Report (SCH No. 2000011025)
Entrada South Project (Project No. 00-210)
Valencia Commerce Center Project (Project No. 87-150)
Planning Commission Agenda Item 6 (Oct. 1, 2025)**

To the Los Angeles County Regional Planning Commission and Senior Planner Sackett:

This comment is submitted on behalf of Supporters Alliance For Environmental Responsibility ("SAFER") and its members living or working in and around the County of Los Angeles ("County") regarding the supplemental environmental impact report ("SEIR") (State Clearinghouse No. 2000011025) prepared for the Entrada South Project (Project No. 00-210) and Valencia Commerce Center Project (Project No. 87-150) (collectively, "Project") to be considered as Agenda Item 6 at the Planning Commission's October 1, 2025 meeting.

SAFER is concerned that approval of the Project and certification of the SEIR will violate the California Environmental Quality Act ("CEQA") by (1) failing to disclose the Project's significant and unavoidable impacts and (2) failing to require all feasible mitigation measures for the Project's significant and unavoidable impacts. Furthermore, SAFER is concerned that the Planning Commission is being asked to adopt CEQA Findings of Fact and a Statement of Overriding Considerations that were *not* included with the Agenda materials. As such, the Planning Commission is being asked to approve documents that have not been presented to the Commission or the public. SAFER also joins in all comments submitted to the County in opposition to the SEIR, including but not limited to those submitted by CREED LA, the Western States Regional Council of Carpenters, and Friends of the Santa Clara River.

SAFER respectfully requests that the Planning Commission continue further consideration of the Project to allow time for staff to (1) provide the CEQA Findings of Fact and

Statement of Overriding Considerations to the Commission and the public and (2) revise the SEIR to adequately disclose the Project's significant and unavoidable impacts and apply all feasible mitigation measures.

PROJECT DESCRIPTION

The Project consists of two components. First, the Entrada South Project proposes 1,574 residential units (consisting of single-family detached condominiums as well as attached townhomes and multi-family units) and 730,000 square feet of commercial/office uses within the Entrada South Planning Area, which consists of approximately 382.3 acres located west of I-5 and The Old Road and predominantly south of Six Flags Magic Mountain. Second, the Valencia Commerce Center ("VCC") proposes 3.4 million square feet of non-residential uses (industrial/business/office park) within the VCC Planning Area, which consists of approximately 328.5 acres of an undeveloped portion of the partially completed VCC non-residential center (industrial/business/office park) located west of I-5 and north of State Route 126.

The Entrada South Planning Area and VCC Planning Area are within the planning boundary of the Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan (RMDP/SCP). CDFW approved the RMDP/SCP and certified its EIR in 2010. Subsequently, the EIR was challenged in court and CDFW was ordered to conduct an Additional Environmental Analysis ("AEA"), which CDFW certified in 2017. Collectively, the 2010 EIR and 2017 AEA are referred to as the "2017 EIR" or "State-certified EIR."

The Entrada South Project differs from the project analyzed in the State-certified EIR by reducing the amount of residential units (from 1,725 units to 1,574 units or from approximately 3,235,100 square feet to 2,951,913 square feet) and increasing the commercial/office uses (from 450,000 square feet to 730,000 square feet). For the VCC Project, the 3.4 million square feet of non-residential uses were assumed in the State-certified EIR.

To analyze the modifications to the project as analyzed in the 2017 EIR, the County prepared a Supplemental Environmental Impact Report ("SEIR"), consisting of a Draft SEIR, Revised Draft SEIR, and Final SEIR. The SEIR included the mitigation measures from the 2017 EIR as well as new or modified mitigation measures. The SEIR's stated purpose is to analyze whether the proposed Project would result in any new or substantially more severe significant impacts compared to the 2017 EIR.

LEGAL STANDARD

CEQA requires that an agency analyze the potential environmental impacts of its proposed actions in an EIR (except in certain limited circumstances). (See, e.g., Pub. Resources Code, § 21100.) The EIR is the very heart of CEQA. (*Dunn-Edwards v. BAAQMD* (1992) 9 Cal.App.4th 644, 652.) "The 'foremost principle' in interpreting CEQA is that the Legislature intended the act to be read so as to afford the fullest possible protection to the environment

within the reasonable scope of the statutory language.” (*Communities for a Better Environment v. Cal. Resources Agency* (2002) 103 Cal.App.4th 98, 109 (*CBE v. CRA*).)

CEQA has two primary purposes. First, CEQA is designed to inform decision makers and the public about the potential, significant environmental effects of a project. (14 CCR § 15002(a)(1).) “Its purpose is to inform the public and its responsible officials of the environmental consequences of their decisions before they are made. Thus, the EIR ‘protects not only the environment but also informed self-government.’” (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.) The EIR has been described as “an environmental ‘alarm bell’ whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return.” (*Berkeley Keep Jets Over the Bay v. Bd. of Port Comm’rs.* (2001) 91 Cal.App.4th 1344, 1354 (*Berkeley Jets*); *County of Inyo v. Yorty* (1973) 32 Cal.App.3d 795, 810.)

Second, CEQA requires public agencies to avoid or reduce environmental damage when “feasible” by requiring “environmentally superior” alternatives and all feasible mitigation measures. (14 CCR § 15002(a)(2) and (3); see also *Berkeley Jets*, 91 Cal.App.4th at 1354; *Citizens of Goleta Valley*, 52 Cal.3d at 564.) The EIR serves to provide agencies and the public with information about the environmental impacts of a proposed project and to “identify ways that environmental damage can be avoided or significantly reduced.” (14 CCR § 15002(a)(2).) If the project will have a significant effect on the environment, the agency may approve the project only if it finds that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns.” (Pub. Res. Code, § 21081; 14 CCR § 15092(b)(2)(A) and (B).)

While the courts review an EIR using an “abuse of discretion” standard, “the reviewing court is not to ‘uncritically rely on every study or analysis presented by a project proponent in support of its position. A ‘clearly inadequate or unsupported study is entitled to no judicial deference.’” (*Berkeley Jets*, 91 Cal.App.4th at 1355 [quoting, *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal. 3d 376, 391, 409, n. 12.]) “A prejudicial abuse of discretion occurs ‘if the failure to include relevant information precludes informed decisionmaking and informed public participation, thereby thwarting the statutory goals of the EIR process.’” (*Berkeley Jets*, *supra*, 91 Cal.App.4th at 1355.)

An EIR must “include[] sufficient detail to enable those who did not participate in its preparation to understand and to consider meaningfully the issues the proposed project raises.” (*Sierra Club v. Cty. of Fresno* (2018) 6 Cal.5th 502, 510.) “Whether or not the alleged inadequacy is the complete omission of a required discussion or a patently inadequate one-paragraph discussion devoid of analysis, the reviewing court must decide whether the EIR serves its purpose as an informational document.” (*Id.* at 516.) “The determination whether a discussion is sufficient is not solely a matter of discerning whether there is substantial evidence to support the agency’s factual conclusions.” (*Id.*) As the Court emphasized:

[W]hether a description of an environmental impact is insufficient because it lacks analysis or omits the magnitude of the impact is not a substantial evidence question. A conclusory discussion of an environmental impact that an EIR deems significant can be determined by a court to be inadequate as an informational document without reference to substantial evidence.

(*Id.* at 514.)

In general, mitigation measures must be designed to minimize, reduce or avoid an identified environmental impact or to rectify or compensate for that impact. (14 CCR § 15370.) Where several mitigation measures are available to mitigate an impact, each should be discussed and the basis for selecting a particular measure should be identified. (14 CCR § 15126.4(a)(1)(B).) A lead agency may not make the required CEQA findings unless the administrative record clearly shows that all uncertainties regarding the mitigation of significant environmental impacts have been resolved.

DISCUSSION

I. The SEIR Fails to Adequately Disclose the Project's Significant and Unavoidable Impacts.

An EIR must describe any significant environmental effects that cannot be avoided if the project is implemented. (Pub. Res. Code § 21100(b)(2)(A).) Significant effects that cannot be mitigated must be described as well as effects that can be mitigated but not reduced to a level of insignificance. (14 CCR § 15126.2(c).) If unavoidable impacts cannot be reduced or avoided without changing the design of the project, the EIR must describe the reasons the project is being proposed despite the unavoidable impacts. (14 CCR § 15126.2(c).)

Notably, the discussion of unavoidable impacts must be included in a separate section of the EIR. (Pub. Res. Code § 21100(b)(2)(A).) Here, the SEIR included its discussion of significant and unavoidable impacts in Section 7.0: Other Environmental Considerations. (DSEIR, p. 7.0-1.) In that section, the SEIR does not disclose *any* significant and unavoidable impacts. Instead, the SEIR merely states:

Impacts associated with the Modified Project are evaluated in Section 5.0, Environmental Impact Analysis, of this SEIR. Based on that analysis, it was determined that the Modified Project would not result in new or substantially more severe significant impacts than previously identified for the 2017 Project in the State-certified EIR.

(*Id.*) The SEIR's discussion above is inadequate because it does not disclose which impacts remain significant and unavoidable *even if* they are not new or substantially more severe. (See *Communities for a Better Env't. v. California Resources Agency* (2002) 103 Cal.App.4th 98, 124-

25 [Even though a prior EIR's *analysis* of environmental effects may be subject to being incorporated in a later EIR for a later, more specific project, the responsible public officials must still go on the record and explain specifically why they are approving the later project despite *its* significant unavoidable impacts.”].) Although the SEIR contains a statement explaining why the Project is being considered despite significant and unavoidable impacts (DSEIR, pp. 7.0-1 to -2), the SEIR utterly fails to disclose what those impacts actually are. Furthermore, it is clear that the Project will have significant and unavoidable impacts because the Staff Report’s proposed motion on the Project clearly states:

I MOVE THAT REGIONAL PLANNING COMMISSION . . .

DETERMINE THE ENTRADA SOUTH PROJECT'S AND VCC PROJECT'S SIGNIFICANT AND UNAVOIDABLE IMPACTS ARE OUTWEIGHED BY SPECIFIC SOCIAL, ECONOMIC, LEGAL, TECHNOLOGICAL, OR OTHER CONSIDERATIONS THROUGH ADOPTING THE PROPOSED STATEMENT OF OVERRIDING CONSIDERATIONS PREPARED PURSUANT TO PUBLIC RESOURCES CODE SECTION 21081(b) AND CEQA GUIDELINES SECTION 15093, AND ATTACHED HERETO IN EXHIBIT F.

(Staff Report, pp. 2-3.) However, like the SEIR, the Staff Report does not state which impacts are significant and unavoidable.

Other sections of the SEIR do nothing to alleviate the confusion over which impacts remain significant and unavoidable. For example, Table 2.0-2 purports to show a “Summary of Environmental Impacts, Mitigation Measures, and Resulting Levels of Significance.” (RDSEIR, pp. 2.0-29 to -192.) However, for each impact found significant and unavoidable in the 2017 EIR, Table 2.0-2 states the same conclusion for this Project’s impacts: “No Substantial Increase in Severity of Impact.” Again, this information does not tell the reader which impacts actually remain significant and unavoidable.

The SEIR’s detailed sections on each impact are similarly confusing. For air quality, the SEIR does disclose that the 2017 EIR found construction-related, operational, and cumulative air quality impacts to be significant and unavoidable. However, even though the SEIR concedes that “emissions within the VCC Planning Area would be the same as reported in the State-certified EIR,” there is *no* indication of whether impacts remain significant and unavoidable. Instead, the air quality section merely concludes that “the Modified Project would not result in new or substantially more severe significant impacts related to air quality as compared to the 2017 Project in the State-certified EIR.” (DSEIR, p. 5.1-65.) Similarly for noise impacts, the SEIR fails to disclose whether cumulative operational traffic noise impacts remain significant and unavoidable despite the SEIR’s conclusion that the Project would not cause a substantial increase compared to the 2017 EIR. (RDSEIR, pp. 5.8-47, -53.)

The SEIR must be revised to clearly disclose which impacts are significant and

unavoidable. As written, no reader of the SEIR could reasonably understand which impacts from the 2017 EIR remain significant and unavoidable. Furthermore, without knowing which impacts remain significant and unavoidable, the Planning Commission cannot in good conscience recommend that the Board of Supervisors approve this Project despite the significant and unavoidable impacts. SAFER respectfully requests that the Commission continue any consideration of the Project until the SEIR is revised to clearly disclose the Project's significant and unavoidable impacts.

II. The SEIR Fails to Adopt All Feasible Mitigation Measures for the Project's Significant and Unavoidable Impacts.

CEQA prohibits a lead agency from approving a project with significant environmental effects if there are feasible mitigation measures or alternatives that can substantially lessen or avoid those effects. (Pub. Res. Code § 21002; *Mountain Lion Found. v. Fish & Game Comm'n* (1997) 16 Cal.4th 105, 134; *Laurel Heights*, 47 Cal.3d at 403 ["The chief goal of CEQA is mitigation or avoidance of environmental harm"].) CEQA defines "feasible" as "capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social and technological factors." (PRC §21061.1; 14 CCR § 15364.) "The core of an EIR is the mitigation and alternatives sections." (*Citizens of Goleta Valley*, 52 Cal.3d at 564.) When an EIR concludes that a project will have significant impacts, the lead agency has two duties: to meaningfully consider feasible mitigation measures and alternatives, and to identify mitigation measures and alternatives rejected as infeasible. (See *Preservation Action Council v. City of San Jose* (2006) 141 Cal.App.4th 1336, 1353.)

The lead agency may not approve a project with significant impacts unless it makes one or more of three findings:

- (1) that changes or alternations have been required in, or incorporated into, the project that mitigate or avoid the significant effects on the environment;
- (2) that the agency making the findings lacks jurisdiction to make the change, but that another agency does have such authority, and either has made or can and should make, the change; and/or
- (3) that specific economic, legal, social, technological, or other considerations ... make infeasible the mitigation measures or project alternatives identified in the EIR.

(Pub. Res. Code §21081(a); 14 CCR §15091(a).)

When a comment suggests "better ways to avoid or mitigate the significant environmental impacts" (14 CCR §§15088(c), 15204(a)), the lead agency must respond to the comment by either explaining why further consideration of the alternative or mitigation was rejected or by providing an evaluation of the alternative. (*Marin Mun. Water Dist. v. KG Land*

Cal. Corp. (1991) 235 Cal.App.3d 1652, 1666; *Cal. Native Plant Soc’y v. City of Santa Cruz* (2009) 177 Cal.App.4th 957, 992 (CNPS).) “[A]n adequate EIR must respond to specific suggestions for mitigating a significant environmental impact unless the suggested mitigation is facially infeasible.” [citation omitted] “While the response need not be exhaustive, it should evince good faith and a reasoned analysis.” (CNPS, 177 Cal.App.4th at 992 [citing *L.A. Unified School Dist. v. City of L.A.* (1997) 58 Cal.App.4th 1019, 1029; see also, *Citizens for Quality Growth v. City of Mount Shasta* (1988) 198 Cal.App.3d 433, 442, fn. 8.)

As discussed above, the SEIR does not clearly disclose which impacts of the Project are significant and unavoidable. The 2017 EIR concluded that project-level and cumulative construction-related air quality impacts would be significant and unavoidable. (DSEIR, pp. 5.1-62 to -63.) The SEIR does not claim that these impacts have been reduced to less-than-significant levels. As such, the County must require all feasible mitigation measures to reduce the noise impacts to the extent possible prior to proceeding with the Project. (Pub. Res. Code §21081(a); 14 CCR §15091(a).)

For construction emissions, the Project must adhere to ES/VCC-PDF-AQ-2, which provides:

All off-road diesel-powered construction equipment greater than 50 horsepower shall meet Tier 4 emission standards, where available. At a minimum, all off-road diesel-powered construction equipment greater than 50 horsepower shall meet the Tier 3 emission standards for non-road diesel engines promulgated by the U.S. Environmental Protection Agency.

(MMRP, p. 6.) However, that measure does not take into account that two types of Tier 4 equipment are currently available: Tier 4 Final and Tier 4 Interim (See 40 C.F.R. § 86.1811-27.) By only requiring the use of Tier 4 without specifying “Final” or “Interim,” ES/VCC-PDF-AQ-2 fails to ensure that the impacts have been reduced to the extent feasible. The County must amend ES/VCC-PDF-AQ-2 to require “Tier 4 Final” equipment to ensure the maximum feasible mitigation for the Project’s construction-related air quality impacts. Only then can the County make the findings required for approving the Project despite its significant and unavoidable impacts.

III. The Agenda Packet Fails to Include the CEQA Findings of Fact and Statement of Overriding Considerations.

According to the Staff Report’s proposed motion, the Planning Commission is being asked to adopt CEQA Findings of Fact (“CEQA FOF”) and a Statement of Overriding Considerations for the Project’s significant and unavoidable impacts. (Staff Report, pp. 2-3.) The Staff Report claims that the CEQA FOF and Statement of Overriding Considerations are attached to the Staff Report as Exhibit F. However, there was no Exhibit F provided with the original Staff Report. Staff subsequently released updated versions of the Staff Report

attachments. However, in the updated version, Exhibit F is only the Project Mitigation and Monitoring Reporting Program, which lists the Project's mitigation measures but does *not* include the CEQA FOF or Statement of Overriding Considerations. (See List of Staff Report Attachments, <https://lactrp.legistar.com/View.ashx?M=F&ID=14815860&GUID=6321FDC5-AE89-4653-8E8F-02AFFD5F6F03>; Attachment-Part 3 of 3 Exhibits E through L (Updated Version), <https://lactrp.legistar.com/View.ashx?M=F&ID=14815857&GUID=A498CC95-40A7-473B-8A9A-FB9021491341>.)

The CEQA FOF and Statement of Overriding Considerations are essential to the Planning Commission's decisions on this Project. The CEQA FOF and Statement of Overriding Considerations are referenced in the proposed resolution for the Development Agreement (Staff Report, Ex. C, ¶ 64), the proposed resolution for the Zone Change (Staff Report, Ex. C, ¶ 38), the proposed resolution for the Vesting Tentative Tract Map (Staff Report, Ex. C, ¶ 18), and the proposed resolution for the Conditional Use Permit, Housing Permit, Parking Permit, and Oak Tree Permit (Staff Report, Ex. C, ¶ 19).

Clearly, the Planning Commission should not take action on this Project based on a CEQA FOF and Statement of Overriding Considerations that it has not seen or reviewed. Furthermore, the public should be given the opportunity to review the CEQA FOF and Statement of Overriding Consideration in order to make informed comments to the Planning Commission.

Because the CEQA FOF and Statement of Overriding Considerations have not been presented to the Planning Commission and the public, SAFER respectfully requests that the Commission continue further consideration of this Project until the CEQA FOF and Statement of Overriding Considerations has been made publicly available for review.

CONCLUSION

Approval of the Project and the SEIR would violate CEQA by: (1) failing to disclose the Project's significant and unavoidable impacts and (2) failing to require all feasible mitigation measures for the Project's significant and unavoidable impacts. Furthermore, the Planning Commission and the public have not had the opportunity to review the Project's CEQA Findings of Fact and Statement of Overriding Considerations. For those reasons, SAFER requests that Planning Commission refrain from approving the Project at this time and, instead, direct staff to revise the SEIR and to circulate the CEQA Findings of Fact and Statement of Overriding Considerations.

Sincerely,

Brian B. Flynn

Re: Additional DEIR Comments, Entrada South and Valencia Commerce Center
Please copy to all Commissioners

SCOPE, Friends of the Santa Clara River and their respective members have commented extensively on Fivepoint's westside projects, including the Newhall Ranch Specific Plan, the Resource Management Plan and the previous draft Entrada South EIR released in 2015. These current comments are timely filed via email on Sept. 29th, 2025.

Inadequate Public Notice

In addition to the concerns we expressed in our NOP and DEIR comments regarding circulation of that document, we now provide additional concerns regarding distribution of supplement attachments regarding threatened species not circulated in the DEIR and bought up with very short notice to the Planning Commission as indicated in the Supplemental agenda packet.

The outcome of this proposal is very important to the community because of its many impacts on the Santa Clara River, schools, the increased wildfire danger, traffic and Green House Gases and water capacity, not to mention the loss of native oaks. These issues all make it a serious concern to residents in the SCV. Yet no hard copy of the DEIR was available at the Stevenson Ranch Library, and other indicated libraries. This is not what was advertised in your notice of availability and is not sufficient public availability of the document for the following reasons:

- Newer computers no longer have slots for usb ports, so the usb flash drive is useless
- Downloads are extremely slow, especially if they contain large maps.
- Maps are difficult to read on small computer screens and difficult to review at a working group meeting.

For this reason and because of the gag order placed on several large environmental organizations by Newhall Land in the 2017 settlement agreement, you may not have received many comment letters on this project. We believe these access issues have diminished the public's ability to obtain and review these documents.

EIR Process Issues

We continue to object to the EIR process for this project. According to the County's website regarding this project¹:

The Newhall Ranch Specific Plan consists of comprehensive plans, development regulations, design guidelines, and implementation program consistent with the Los Angeles County General Plan and Santa Clarita Valley Area Plan. Newhall Ranch Specific Plan considers the changes in society and the economy that may occur over the 25-year buildout of the community. The Specific Plan also establishes the protection of open areas next to the community and two large special resource management areas totaling approximately 6,170 acres. The Newhall Ranch Specific Plan was adopted on May 27, 2003.

Neither the Valencia Commerce Center Plan nor Entrada South were or are a part of the Newhall Ranch Specific Plan, nor were zone changes or reviews processed through this Specific Plan. Further, the Specific Plan and its approval did not anticipate that it would be the final review document for ANY tract, instead spelling out that further tracts would require further review as they were brought for individual approvals.

The EIR refers to the OVOV Area Santa Clarita Area Plan update throughout the document, but Entrada was not considered in that document. While the Newhall Ranch specific Plan was listed among the specific plans, as previously stated, this Entrada project was not part of the Newhall Ranch Specific Plan and is not included in the OVOV plan.

The Entrada South area was included as part of the River Management Plan for Newhall Ranch, a joint State and Federal document focused on river management. Due to the size of the area affected, all impacts were required to be reviewed in order to comply with Clean Water Act requirements. While we agree that this vast overview analysis serves well to address cumulative impacts for the massive amount of development proposed, it does not serve at all as an adequate disclosure of project level impacts or as a means of determining County mitigation requirements.

Tiering on the Resource Management Plan

As we stated in our NOP and DEIR comments, we believe that reliance on the 15-year-old Resource Management Plan for information on climate change/GHG emissions, aesthetics, traffic and any other omitted area is inappropriate. The Resource Management Plan was an overview document produced for a federal and state river alteration approval, and should not be substituted for the detailed project level study that provides public disclosure and ensures the development of mitigation measures that will be enforced by the County. According to CEQA, **mitigation measures must be “fully enforceable through permit conditions, agreements, or other measures” so “that feasible mitigation measures will actually be implemented as a condition of development.”** (*Federation of Hillside & Canyon Ass'ns v. City of Los Angeles* (2000) 83 Cal.App.4th 1252, 1261 ((quoting Pub. Res. Code § 21081.6(b)).) We note that while the title page of the document claims to

¹ <https://planning.lacounty.gov/long-range-planning/newhall-ranch-specific-plan/>

include a development agreement, that document was not included in the DEIR materials on the County website (see screen shot below)

The FEIR/EIS for the River Management Plan on which these project-tiering requests are made, was completed in 2010, 15 years ago, and those documents relied on data that was even older than that. An additional focused state/federal document was prepared and circulated and approved in 2017 to address the direction of CA Supreme Court which set the EIR/EIS aside for its failure to follow CA law and to address and mitigate for the GH Gas emissions and climate heating. Since that time many changes have occurred that were not previously predicted. These included year after year of record-breaking temperature² increases, reduced rainfall for groundwater recharge-water supply and massive wildfires caused by drought and dried vegetation. While we appreciate the additional detailed information provided in this EIR, we still assert that the County must be able to enforce all mitigation measures in all CEQA review areas, and provide additional mitigation to address these new facts. Accurate up to date data must be provided which cannot be accomplished by tiering on an old document.

We note that the previously released draft EIR for Entrada South (2015)³ did not attempt to tier on the Resource Management Plan even though it was an approved document at the time. Further, the developer did not attempt to and the County and the City did not allow tiering for its San Francisquito Creek projects on a similar overview plan, the Natural River Management Plan, as part of the review for those projects. It is now just as inappropriate to

² Climate Change: Global Temperature

By Rebecca Lindsey AND LuAnn Dahlman Reviewed By Jessica Blunden Published January 18, 2024
Earth's temperature has risen by an average of 0.11° Fahrenheit (0.06° Celsius) per decade since 1850, or about 2° F in total. The rate of warming since 1982 is more than three times as fast: 0.36° F (0.20° C) per decade. 2023 was the warmest year since global records began in 1850 by a wide margin. It was 2.12 °F (1.18 °C) above the 20th-century average of 57.0°F (13.9°C). It was 2.43 °F (1.35 °C) above the pre-industrial average (1850-1900). The 10 warmest years in the historical record have all occurred in the past decade (2014-2023).

³ The EIR fails to mention this document, but it is available in county files or we can provide it upon request.

allow an outdated overview document to be used for the detailed project specific analysis and mitigation required for the current proposal.

Combining of two separate non-contiguous projects in one EIR

It is well established that the purpose of an EIR is to provide public agency decision-makers and members of the public with an informational document that explains potentially significant environmental impacts and feasible mitigation measures. (Pub. Res. Code §§ 21002.1, 21061; CEQA Guidelines §§ 15121, 15151; *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 426-27; *Carmel Valley View, Ltd. v. Board of Supervisors* (1976) 58 Cal.App.3d 817, 821-822.) An EIR must include the full range of potentially significant impacts, as well as reasonably prudent avoidance, minimization, and mitigation measures in the EIR to comply with CEQA's information disclosure requirements. (Pub. Res. Code § 21000 et seq.) CEQA requires the planning agency to "mitigate or avoid the significant effects on the environment of projects that it carries out or approves whenever it is feasible to do so." (Pub. Res. Code §§ 21002.1(b); 15126.4.) Mitigation of a project's significant impacts is one of the "most important" functions of CEQA. (*Sierra Club v. Gilroy City Council* (1990) 222 Cal.App.3d 30, 41.) Importantly, mitigation measures must be "fully enforceable through permit conditions, agreements, or other measures" so "that feasible mitigation measures will actually be implemented as a condition of development." (*Federation of Hillside & Canyon Ass'ns v. City of Los Angeles* (2000) 83 Cal.App.4th 1252, 1261 ((quoting Pub. Res. Code § 21081.6(b)).)

Combining two non-contiguous and unrelated projects, then not describing individual characteristics and impacts, but instead comparing them to a large State and Federal River Management Plan approved 15 years ago makes it nearly impossible to understand what the impacts of these individual projects will be.

Take for example, the impact to oak woodlands and oak trees in the Entrada South portion of the EIR. The 2015 project described the impact to oaks as follows:

The proposed Project would remove 29 valley oaks, 35 scrub oaks, one coast live oak, and two valley oak-scrub oak hybrids. Of the 67 oak trees to be removed, three are heritage oak trees. The Project would encroach on up to 11 other oak trees, including two heritage oak trees. The proposed Project would result in permanent direct impacts to 4.4 acres of valley oak/grass on-site. These direct impacts would be significant. (DEIR p.5.4-77). The DEIR states that this is a significant impact.

In contrast, we are unable to find in the current document any clear description of the number of oaks and the genus that will be removed for the current reduced housing project. This is because the project is merely compared to the River Management Plan which covered the whole Newhall Ranch Specific Plan and additional projects, some 15,000 acres and 30,000 units. The EIR states that the developer must follow the County Oak Ordinance, but disclosing the amount of proposed removals is a requirement of this ordinance. There is not a way to determine if the developer is making an effort to avoid oaks as required by the ordinance and CEQA or even providing suitable habitat for mitigation trees or even if there will be mitigation trees. There is no plain disclosure of impacts but rather an obfuscation that makes it nearly impossible for the public to understand the impacts to the oaks on this project or suggest mitigation.

This same complaint holds true for the impact jurisdictional waters, where the EIR merely states that the impact acreage has increased in the VCC area, but no details are provided in the body of the document. Instead a comparison is made to the impacts in the

state document. The original impacts for the VCC area and how this new proposal will add to them are not laid out in detail so that the public is informed and can provide input, and mitigation or avoidance proposals.

This document is uninformative and confusing throughout, as described above and thus does not meet the CEQA informational requirements. As in *San Joaquin Raptor Rescue Center v. County of Merced* (2007) [149 Cal.App.4th 645, 659](#), "[t]he decision makers and general public should not be forced to sift through obscure minutiae or appendices in order to ferret out the fundamental baseline assumptions that are being used for purposes of the environmental analysis."

Improper Notice of Preparation

The NOP for this document issued In October 2021, referenced tract map #083592.

However, an entirely different tract map (#053295) is discussed In the EIR document.

The NOP noticed map has been removed from the County website, so it is impossible to compare the two maps to understand the differences (see below)

Utilities - Water Supply

While the Initial Study lists Utilities as an area which must be addressed in this document, we note that the DEIR states it did not prepare a new Water Supply Assessment, instead relying on the Urban Water Management Plan. These projects may not do relay simply on the UWMP for several reasons, primarily because they are requesting a plan amendment. In addition, the water supply agreement between Newhall Land/Five Points and Santa Clarita Water states that additional water for their developments would not be made available from Newhall's Nickel Water Acquisition (currently stored in Kern County) will not be supplied until the last tract map of Newhall Ranch has been approved and all litigation settled. (see attached agreement. section 6.8) This is a complicated legal agreement, but It essentially means that the water supply would be quite short for other projects in the event that water was not timely supplied as needed and as represented that it would be, per the Newhall Ranch Specific Plan. Further, Newhall, now FivePoint agreed that farming acreage would be retired in order to supply Newhall Ranch's first two tracts, Landmark and Mission Village. (see water section of the Specific Plan, 2003). While many homes In Mission Village have been built, occupied

and are now receiving water, no farmland seems to have been retired per the requirements of the Newhall Ranch Specific Plan⁴. Because of these anomalies and to ensure adequate water supply for existing and future residents, a Water Supply Assessment must be conducted in accordance with state law (SB610) as noted in our NOP comment. No such analysis was provided in the EIR. This is an EIR deficiency that must be addressed to ensure water availability for existing residents and firefighting needs. Also, there are not water availability letters in the EIR for these projects as required by the County Code.

We are especially adamant that this information be included after reading and commenting on the SCV Sustainable Ground Water Agency's Ground Water Sustainability Plan⁵ which forecasts severe drops in water level due to future development

“But the Groundwater Management Plan, Santa Clara River Valley Groundwater Basin, East Subbasin, Los Angeles County, California (Basin Operating Plan) described in Section 6 contemplates groundwater levels lower than historical levels during dry years, to accommodate future buildout, conjunctive use operating strategies, and climate change (LSCE, 2003). (emphasis added) (p. 8-4)

.....groundwater pumping may temporarily cause groundwater level declines of up to 150 feet in the future. (page 9-15)

As one of the plaintiff's in the litigation over the original 1999 Newhall Ranch Specific Plan, we have not forgotten that a major reason that document was set aside by the Court in 2000 was that it predicted a 10-foot drop in ground water levels, meaning downstream users and environmental needs would be receiving substantially less water. No such water level drop was disclosed or contemplated in the Resource Management Plan. This is obviously changed information and must be addressed in a new EIR.

Also, since the previous Urban Water Management Plan on which this document purports to rely, the Santa Carita Valley Water Agency wells have been impacted with a new pollutant, PFAS, causing the water agency to remove from service around 45% of its wells⁶ to ensure public health until such time that expensive well head treatment facilities can be funded and built. In a 2004 2nd appellate Decision, the Court found that polluted water cannot be relied upon as a supply.⁷ It is therefore imperative that a Water Supply Assessment be provided for these two projects along with the requisite will-serve letters.

⁴ included by reference and in County files

⁵ Santa Clarita Valley Ground Water Sustainability Plan, included by reference, may be accessed here: <https://share.gsiws.com/index.php/s/CrynwfbbiHFCqT>

⁶ <https://yourscvwater.com/sites/default/files/SCVWA/your-water/pfas/SCV-Water-PFAS-Fact-Sheet-May-2024.pdf> “Under the current response levels set in 2020, 28 of the 45 active agency wells were removed from service. This accounted for approximately 45% of the Agency’s groundwater supply and 31% of the total water used in our service area in 2022. Since 2020, four wells are back in service with treatment systems to remove PFAS. These wells restored approximately 11% of the supply and additional groundwater treatment facilities are scheduled to be back online at the rate of one per year for the next 5-7 years.”

⁷ *Friends of the Santa Clara River v. Castaic Lake Water Agency* 123 Cal.App.4th 1 (Cal. Ct. App. 2004) 9 Cal. Rptr. 3d 625

In a 2008 appellate ruling *CA Water Impact Network v. Newhall County Water District*, the Court found that Water Supply Assessments (and in this case, a lack thereof) cannot be litigated separately, but only as a part of a CEQA challenge.⁸

Obligation to Address the Public Trust

Since the Ground Water Sustainability Plan predicts a major drop in ground water levels due in part to future demands from huge projects such as this as well as climate change, we believe the County and the developer are obligated to consider and disclose how such projects will affect the public trust resources, including navigable surface waters and fisheries. Groundwater hydrologically connected to surface waters is also subject to the Public Trust Doctrine to the extent that groundwater extractions or diversions affect or may affect public trust uses (*Environmental Law Foundation v. State Water Resources Control Board* (2018), 26 Cal. App. 5th 844; *National Audubon Society v. Superior Court* (1983), 33 Cal. 3d 419).

Evaluation of water supply impacts should consider potential impacts to and appropriate protections for interconnected surface waters and their tributaries, and interconnected surface waters that support fisheries, including the level of groundwater contribution to those waters. Public Trust Doctrine considerations should carefully evaluate and protect environmental beneficial uses and users of groundwater, including fish and wildlife and their habitats, groundwater dependent ecosystems, and interconnected surface waters.

Inclusion of GHG/Climate Change Analysis

Although requested in our NOP comments this document excludes a GHG analysis, instead relying on the Resource Management Plan. We believe that the impacts to climate change from auto-oriented projects such as Entrada South and the proposed commercial additions have substantially changed since the previous EIR, including increased emissions, occurrences of wildfire and reduced precipitation. While this document updates the traffic study and air quality sections which relate to GHG, it fails to update or even provide a GHG section. Air pollution including GHG such as NOX and other pollutants from new sources such as delivery truck traffic that have become a substantial source of emissions, should be analyzed and mitigated.

This DEIR failed to calculate the impact of the loss of oak trees on greenhouse gas emissions. It is a scientific fact that oaks absorb a significant amount of CO₂ from the atmosphere and re-process it into oxygen. The DEIR should make these calculations and disclose the impacts in the DEIR. Mitigation for this loss should be replacement of the same capacity of trees needed for an equal amount of CO₂ absorption.

Also, as part of the GHG section, the DEIR should include an analysis and inclusion of the mitigation report describing the outcomes for the existing GHG mitigation requirements for the approved Mission tract. This information is necessary so that the public and the decision makers may evaluate whether the proposed mitigation from this previously approved project is in actuality producing reduced climate emissions. Base line assumptions such as the assumption that only 27% of residents will commute out of the Valley for work, and the percentage of EV use, may need to be reevaluated regarding air pollution and GHG emissions to comply with new attainment goals.

⁸ 161 Cal.App.4th 1464 (Cal. Ct. App. 2008)75 Cal. Rptr. 3d 393

A new EIR must be prepared for review and comment whenever significant new information becomes known to the lead agency. Under such circumstances the lead agency is specifically required to re-notice the environmental review document to the public and all responsible agencies, and is required to obtain comments from the same, before certifying the document's impacts, its alternatives analyses, and any mitigation measures. (*See id.*; *see also*, Cal Pub. Res. Code § 21153.) A lead agency's decision not to include a required section of an EIR must be supported by substantial evidence. (CEQA Guidelines § 15088.5(e).)

"Significant new information" includes any information regarding changes in the environmental setting of the project under review. (CEQA Guidelines § 15088.5(a).) It also includes information or data that has been added to the EIR and is considered "significant" because it deviates from that which was presented in the document on which it is being tiered, depriving the public from a meaningful opportunity to comment upon a significant environmental effect of the project, or a feasible way to mitigate or avoid such an effect at the time of circulation of the draft. (*Id.*)

Some examples of when a lead agency may not rely on tiering an EIR:

- (1) When the new information shows a new, substantial environmental impact resulting either from the project or from a mitigation measure;
- (2) When the new information shows a substantial increase in the severity of an environmental impact
- (3) When the new information shows a feasible alternative or mitigation measure that clearly would lessen the environmental impacts of a project and the project proponent declines to adopt the mitigation measure;

Utilities – Waste Service

This section provides inaccurate and out of date information regarding the availability of landfill space at Chiquita Canyon Landfill, which was closed by the operator on January 1st 2025. While this date is after the release of the DEIR, FivePoint was aware and therefore the DEIR Preparer must have been aware of the ongoing heating event, release of leachate into the air and water⁹ and Regional Water Quality Control Board's denial of the landfill's expansion into Cell B which occurred well before the release of the DEIR.¹⁰

⁹ <https://calepa.ca.gov/chiquita-canyon-response/>

¹⁰ **Denial of request:** On Sept. 25, 2024, to protect groundwater under the landfill in Castaic, the Los Angeles Regional Water Quality Control Board reaffirmed its June decision denying Chiquita Canyon LLC's request to place waste in Cell 8B. The board determined that information submitted by the landfill operator was inadequate to address impacts from the ongoing development of individual cells within the landfill.

Notice of Violation: On June 27, 2024, the board issued a Notice of Violation to the landfill operator for alleged violations of the investigative order issued on March 20, 2024, including the

Solid waste has now become an emergency in the Santa Clarita Valley with Antelope Valley and Sunshine Canyon landfills stating they cannot take in more waste. This problem and mitigation to address it must be disclosed in the DEIR.

The heating/burning event at the landfill has now been going on for two years. Nearby residents in Val Verde and Castaic are suffering major health issues from this event which has caused the release of increased odors and irritating pollutants. They have suffered from asthma and an increased rate of cancer. This information should have been disclosed in the DEIR and a study conducted as to whether residents in the Entrada or workers in the VCC area will be exposed to noxious fumes from the landfill.

Oaks

The 2015 DEIR found the impact to oaks and the oak woodlands on the project to be a significant impact, though it is hard to know since as previously stated, it is not clear how many oaks are being removed. The proponent proposed to bring this significant impact to a less than significant level by providing a new, enhanced, and/or restored valley oak/grass area(s) that seems to be located off site, although it is unclear whether that is still the plan.

That is the performance criteria established in the Oak Resource Management Plan. It cites examples of successful completion of each woodland creation or enhancement site as 1) it must not involve any irrigation, planting, or re-seeding for a minimum of three years; 2) oak trees must be within 5 percent of the plan target density for surviving, healthy oak trees; 3) and non-native grass cover must not exceed the target amount of woodland non-native grass cover. While this may be sufficient mitigation for a significant impact, one cannot know that because no such plan has been completed, nor have any specific sites been identified. This precludes the public from reviewing and

failure to submit certain technical reports and monitoring and reporting data. The notice directs the landfill to submit the late and missing information to establish compliance.

Notice of Violation: On April 9, 2024, the Los Angeles Regional Water Quality Control Board issued a Notice of Violation to the landfill operator after investigating multiple complaints from citizens. The notice documents violations of the company's industrial stormwater permit, including unauthorized discharges. Videos and pictures from citizen complaints show water being pumped from the south detention basin into a local waterway that flows into the Santa Clara River. Violations for failing to fully complete the Stormwater Pollution Prevention Plan were also cited. The notice directs the landfill operators to cease the unauthorized discharges, undertake corrective measures and, by May 9, 2024, submit a written response identifying those actions.

Notice of Violation: On March 28, 2024, the board issued a Notice of Violation to the landfill operator for failing to comply with its industrial stormwater permit. The notice documents violations observed by staff during Jan. 29 and Feb. 20 inspections, along with those identified through sampling data submitted by the landfill. The notice directs the landfill operator to take immediate action to correct the alleged permit noncompliance, including the installation of additional best management practices.

Investigative Order: On March 20, 2024, the Los Angeles board issued an investigative order requiring the landfill operator to submit technical reports and additional monitoring and reporting. The order also required the landfill operator to install additional groundwater monitoring wells and conduct sampling of all discharges into the sedimentation basin.

commenting on the adequacy of such a plan. I therefore urge the County not to approve this project without a completed Oak Resource Plan included in the DEIR that the public has had the opportunity to review. I remind the County of recent proposed projects that would have severely impacted another Valley Oak resource area, SEA 64, had not strong requirements, including dedicated open space, been put in place at the time of the project approval.

Also, the previous 2015 DEIR stated that the plan shall be subject to the requirements of County of Los Angeles Oak Tree Ordinance (“CLAOTO”) and shall address impacts to oak resources, including oak trees of the sizes regulated under CLAOTO. Because loss of oaks on this project was determined to be significant by the DEIR, merely following the replacement requirements of the ordinance would not sufficient mitigation. The oak ordinance also requires that the applicant provide the burden of proof as to why he must cut the oaks. That burden of proof was not disclosed and has not been met here, as an alternative providing avoidance was not included in the DEIR.

In fact, California state law requires additional mitigation for loss of the oak woodlands in this project. Section 21083.4. of the CA Resources Code states that:

“ (b) As part of the determination made pursuant to Section 21080.1, a county shall determine whether a project within its jurisdiction may result in a conversion of oak woodlands that will have a significant effect on the environment. If a county determines that there may be a significant effect to oak woodlands, the county shall require one or more of the following oak woodlands mitigation alternatives to mitigate the significant effect of the conversion of oak woodlands:

- (1) Conserve oak woodlands, through the use of conservation easements.
- (2) (A) Plant an appropriate number of trees, including maintaining plantings and replacing dead or diseased trees.
- (B) The requirement to maintain trees pursuant to this paragraph terminates seven years after the trees are planted...etc.”

Since the 2015 DEIR determined that this project would have a significant impact to oak woodlands, this similar project must also have a significant impact. A deferred oak resource plan, if that is what is proposed, is not adequate mitigation to meet state law.

Biological Resources

Since the release of the NOP in 2021, the Southern California mountain lion and the Southwestern Pond Turtle are both now being considered for listing under the CA Endangered Species Act due to the increasing loss of the numbers and diminishing habitat. This constitutes a change since the River Management Plan was released. On page 5.2-41 of the Biological Resources section, the DEIR blatantly mis-represents this fact, stating that there has been no change in status. As a candidate for listing, mountain lions living in the proposed Evolutionarily Significant Unit (ESU) of which this project is a part, are now a candidate species, as is the pond turtle and are temporarily afforded the same protections as a state-listed endangered or threatened species. Mitigation for impacts to these species in the River Management Plan is not sufficient to address this new status and the current EIR fails to discuss it.

Comments Specific to VVC Planning Area

The grading of the existing hill violates the Castaic CSD since the hill is listed as a red line ridge. We ask that the proposed grade is lowered by 1/2 and that the cut south face be graded to look natural allowing the area to become a hiking park area. The required oaks removed from this site should be moved if possible and replaced by the required oak replacement on the existing remaining hill. A further reason to minimize the hill grading is that there are 2 schools and 2 daycare facilities that would be impacted negatively by diesel fumes and dust adding to the already major impacts caused by the landfill fumes and gasses. The addition of a hiking / walking park would be advantages to the existing residents and the commerce center and create a positive life experience.

Conclusion

We believe that the Resource Plan, is not sufficient to address project level impacts for the above stated reasons, i.e. it is based on outdated or inapplicable studies and data. Significant new information will substantially change the DEIR's analyses of the Project's impacts, alternatives and required mitigation, so these areas must be covered in this new document. (*Laurel Heights Improvement Assn. v. Regents of Univ. of Cal.* (1993) 6 Cal.4th 1112, 1132 (*Laurel Heights*).)

We believe the DEIR should have included updated studies on CO2 emissions and other GHG gases and water supply that include an evaluation of a significant ground water level drop, and other safety hazards (such as a study regarding the safety of building on or near existing oil wells with a disclosure of County requirements and how they will be monitored and enforced) should have been included in this new document in order for it to be informative and impacts properly mitigated.

We do not concur that the Climate/GHG chapter may be excluded.

Thank you in advance for your consideration of these concerns and thank you for your time.

Sincerely,

President

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Chair Louie and Commissioners:

On behalf of the Los Angeles County Business Federation (BizFed), a grassroots alliance of 240 business organizations representing 420,000 employers with 5 million employees throughout Southern California, we write to share our strong support for the Valencia by the Fivepoint community and its proposed next phases: Entrada South and the continued development of Valencia Commerce Center.

BizFed is dedicated to fostering the long-term economic health and prosperity of Los Angeles County. Our mission is to advocate for policies and projects that strengthen our regional economy. With the latest edition of Entrada South and the Valencia Commerce Center will further its journey of creating a healthy and affordable community for thousands of southern Californians.

As you are aware, Los Angeles County is facing a severe and worsening housing crisis that harms our competitiveness and stifles our economy. Entrada South will help address this challenge by creating more than 1,000 new homes at a variety of price points, which will also move L.A. County closer to meeting the goals outlined in its 2021-2029 Housing Element. Additionally, the plan will create up to 3.4 million additional square feet of job-producing commercial space at Valencia Commerce Center, which is already a significant economic engine and tax revenue generator in the Santa Clarita Valley. Housing near jobs is a key goal for the development and Valencia. Our businesses need housing for their workforce. This development will help to keep and attract businesses to continue to grow our economy.

Valencia by FivePoint is a net-zero greenhouse gas and net-zero energy, committed to a sustainable development investing numerous programs to achieve this goal. Furthermore, there is a wide array of resident amenities, a comprehensive transportation and mobility program, and will ultimately provide more than 10,000 acres of permanently protected open space. This proposal has earned our support, and we hope it will earn your vote.

If you have any questions, please don't hesitate to contact our BizFed Director of Advocacy, Chris Wilson at (562) 201-6034 or chris.wilson@bizfed.org

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Regional Planning Commissioners:

Our company is a licensed General Contractor and a member of Local Union 12, 300, 600, and 209 that has worked on the community development to date at Valencia by FivePoint's Mission Village project. The next phase of the Valencia by FivePoint community includes Entrada South and Valencia Commerce Center.

Pursuant the CFD Acquisition Agreement with Los Angeles County, prevailing wage is required for all contracts for construction of public improvements for horizontal infrastructure within the Project's Community Facilities District, which will ultimately account for hundreds of millions of dollars in public infrastructure work. We as contractors comply with these prevailing wage requirements.

The Project also advances California's climate leadership and protects the environment. Valencia by FivePoint is the only Net Zero Greenhouse Gas master planned community project of its kind under construction that implements a comprehensive Net Zero program approved by the California Air Resources Board and State resource officials. The Project is consistent with and implements the County's Housing Element and General Plan, and it is consistent with the region's Sustainable Communities Strategy.

The Project also includes extensive open space, a commitment to clean energy, zero-emission transportation investments, comprehensive bike and pedestrian trails, off-site sustainability improvements in underserved communities, and scores of other features that protect the environment and advance health and wellness. Importantly, the Project also complies with California's stringent fire codes to promote comprehensive fire prevention and protection. Mission Village has already been a powerful economic driver for our company, our employees and our community. We believe Entrada South and Valencia Commerce Center will be an even stronger catalyst to promote prosperity throughout this region.

Safety • Quality • Service

Los Angeles, CA 90012

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Los Angeles County Regional Planning Commission,

The California Institute of the Arts (CalArts), a Disney endowed, internationally recognized arts college welcomed its first class in 1970, and has been serving the Santa Clarita Valley and beyond ever since. We offer comprehensive degree programs in visual, performing, media and literary arts from our campus in Valencia, where students have access to local experts and extensive community resources.

FivePoint and its subsidiary, the Newhall Land & Farming Company (who helped facilitate opening our campus), have been longstanding members of the community and bring expansive benefits to the region. The first phase of Valencia by FivePoint, now home to several thousand residents, has been a well-recognized success for the Santa Clarita Valley. The proposed next phase -- Entrada South and the continuation of the Valencia Commerce Center -- will build on that success.

Importantly, the new community will deliver more than 1,500 high-quality, price-attainable homes that can serve our faculty, staff, students, and alumni. Valencia Commerce Center may also one day house creative businesses that provide solid employment and internship opportunities for our student body and graduates.

At CalArts, environmental stewardship is one of our guiding principles. It is a priority we share with FivePoint. At full buildout, Valencia by FivePoint community will be one of the largest in the nation to commit to achieving net zero greenhouse gas emissions, thanks to a variety of on-site and off-site investments. In addition, FivePoint has committed to permanently protect up to 10,000 acres of the vast open space we enjoy in the Santa Clarita region, and its energetic conservation work has protected a variety of native wildlife habitats and animal species.

A rising tide lifts all ships, and the health of CalArts depends on the health of our broader region. The next phase of Valencia by FivePoint will bring meaningful benefits to this community, as well as our school and our environment. We urge you to give this project your full support.

Sincerely,

Ravi Rajan, President

County of Los Angeles Department of Regional Planning
320 West Temple Street
Los Angeles, CA 90012

RE: *SUPPORT for Entrada South (Project 00-210) & Valencia Commerce Center (Project 87-150)*

Dear L.A. County Planning Commissioners:

California Business Properties Association has been an advocate for commercial real estate in California for over 50 years, serving as the recognized voice of all aspects of the real estate industry. We represent over 10,000 members across the office, retail, and industrial sectors and advance responsible real estate development.

CBPA strongly supports FivePoint's plans to bring extensive economic benefits to the Santa Clarita Valley community with the continuation of Valencia by FivePoint.

FivePoint is seeking your approval for the Entrada South community and the next portion of the Valencia Commerce Center. Valencia by FivePoint is already home to over 3,000 residents and poised to be a powerful economic engine in the Santa Clarita Valley. It has delivered thousands of construction jobs and permanent jobs, meaningful economic output, and significant annual tax revenues for L.A. County and the State. These new entitlements will only continue and expand this positive impact.

The Valencia Commerce Center is an existing commercial center that is already home to businesses in the aerospace, healthcare, and engineering sectors, among others.

This next phase will bring up to 3.4 million square feet to VCC in the heart of the growing Santa Clarita Valley, generating even greater economic benefits for the region and its residents. This will allow residents additional opportunities to work locally at new quality jobs created in VCC.

The addition of more than 1,500 new homes in Entrada South will also help relieve the housing crisis that has been holding our economy back.

FivePoint's plan will deliver substantial economic benefits at the local, regional, and state levels and CBPA is proud to support it. Thank you for your consideration of our views.

Respectfully,

Matthew Hargrove
President & CEO

Re: Support for Continuation of Valencia by Fivepoint: Entrada South and Valencia Commerce Center

Dear L.A. County Regional Planning Commission,

Established in 1924, Central City Association (CCA) is committed to advancing policies and projects that enhance Downtown Los Angeles' (DTLA) vibrancy and increase opportunity in the region. We are a membership organization representing over 300 members including businesses, nonprofits and trade associations that have played a leading role in transforming DTLA into a dynamic mixed-use 24/7 urban environment. In keeping with our mission to support affordable and sustainable housing development, **we are pleased to voice our strong support for the continuation of Valencia by Fivepoint's development project, Entrada South and Valencia Commerce Center.**

At a time when affordable housing is in desperate need across L.A. County, Entrada South is a vital opportunity to help meet this urgent demand. The proposed project will introduce over 1,000 new residential properties to the Valencia by Fivepoint area, thus addressing the housing insecurity in the region. In addition to housing, the plan includes a significant amount of community retail space which will increase vitality to the region, support local businesses and create a sense of belonging for businesses and residents alike. Furthermore, the development will complete the Valencia Commerce Center creating a job-generating commercial space hub for industries such as aerospace, healthcare, engineering, light manufacturing and entertainment. These employment opportunities will support the local economy thrive and continue to build a strong Valencia by Fivepoint community.

We request your support for the continuation of Valencia by Fivepoint's development project, Entrada South and Valencia Commerce Center. This project would not only promote more affordable housing development but does so with the forefront of sustainability and the health of their residents and workers in mind.

We appreciate your consideration.

Sincerely,

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Planning Commission:

A leading climate action organization, Climate Resolve seeks to achieve equitable climate solutions by connecting communities, organizations and policymakers on climate change. We inclusively develop practical initiatives that reduce climate pollution and prepare for climate impacts.

Over the past six years, Climate Resolve has provided key services to Valencia by FivePoint by helping the development achieve net-zero greenhouse gas emissions. We do so by organizing beneficial mitigation projects in Los Angeles County – verified by the Climate Action Reserve's Climate Forward program. The Climate Forward registry program is integral to ensuring the emission mitigation projects provide quantified and verified greenhouse gas reductions.

In fact, we view FivePoint's net-zero commitment as a model for the nation – it points a way to build much-needed housing and simultaneously address California's climate crisis. FivePoint's on-site sustainability investments include constructing zero net energy homes, installing Level 2 EV Charger in each home, and installing some additional 2,000 EV charging stations in Valencia's commercial and community areas. Off-site sustainability measures include solar retrofits for homes in disadvantaged communities in L.A. County (which Climate Resolve facilitated) and sequestering carbon through permanent protection of two forests in Humboldt County . . . this is just a partial list of FivePoint's existing and planned investments.

The next phase of Valencia – Entrada South and Valencia Commerce Center – follows in the same path of Valencia's commitment to wholly mitigate the development's greenhouse gas emissions – as well as building resiliently and sustainably. The new phase deserves the Los Angeles County Regional Planning Commission support and approval.

Sincerely,

Jonathan Parfrey
Executive Director

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150) – to be updated upon receipt of Agenda Item Number

Dear Commission Chair Louie and Commissioners,

The Valley Industry Association of Santa Clarita (VIA) extends its strong and emphatic support for the proposed continuation of the Valencia by FivePoint community in the Santa Clarita Valley.

VIA has represented business and industry stakeholders in the Santa Clarita Valley since 1981, promoting job growth, workforce training, and a strong economy through advocacy, education and collaboration. Valencia by FivePoint is an innovative master-planned community that combines adding critical housing supply and creating new job opportunities into one of the largest net-zero GHG communities in the nation, directly enhancing our region's continued prosperity.

Entrada South and the next stage of the Valencia Commerce Center (VCC) will extend the positive momentum generated by the Valencia community, benefiting all of L.A. County. Specifically, Entrada South will create more than 1,500 new homes of urgently needed new housing – including affordable units – along with new retail space, while the expansion of VCC will help support the growth and vitality of the Santa Clarita Valley economy, which has seen more than 23,000 additional jobs generated over the past 15 years alone. And importantly, the entire community will continue to be carbon-neutral, with an impressive

sustainable mobility program while also incorporating abundant open space, parks, and trails. No other community in California can make the same claim.

The Valencia by FivePoint team is an integral part of our community and deeply committed to our long-term success. We are fortunate to have partners of this caliber working for the long-term benefit of the Santa Clarita Valley. We eagerly await the continued development of this far-sighted project and support approval of this next phase of Valencia Commerce Center and Entrada South at this time.

Sincerely,

A handwritten signature in dark ink, appearing to read "Kathy Norris", written over the printed name.

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Regional Planning Commissioners,

The Valencia Commerce Center Association represents owners of businesses and properties in Valencia Commerce Center, a flourishing commercial/industrial business park in the Santa Clarita Valley. The Commerce Center is home to nearly 300 businesses in a range of industries that fuel the economy of Los Angeles and the surrounding region. The Association and its Board of Directors strongly support FivePoint's proposal to expand this important economic asset as part of the next phase of entitlements for the *Valencia by FivePoint* master-planned community.

The Newhall Land & Farming Company, now part of FivePoint, began the development of the Commerce Center nearly 40 years ago. With over 9 million square feet of commercial space well located in this growing region, adjacent to the third-largest city in L.A. County, the Commerce Center is a vital source of high-quality jobs, critical tax revenue and overall economic activity that benefits the entire County. FivePoint's proposal to nearly complete the Commerce Center by adding up to 3.4 million additional square feet of commercial and industrial space will expand and strengthen its positive impact on our region. Additionally, it will help the Santa Clarita Valley extend its leadership in key sectors such as healthcare, technology, aerospace, entertainment and finance.

The proposed next phase of the Commerce Center is part of an innovative community envisioned by FivePoint that includes thousands of price-attainable homes, plans for community-serving retail space, parks and recreation areas, preserved and funded open space, 50 miles of trails, a library, fire stations, and more. Notably, the full community is designed to achieve net zero greenhouse gas emissions, enabled by wide-ranging sustainability investments throughout the Santa Clarita Valley, L.A. County and elsewhere in California. This is a progressive and brave approach to community building that achieves many of L.A. County's objectives including economic growth, increased housing production and protection of the environment.

Economic resources like Valencia Commerce Center must continue to evolve to stay relevant in our dynamic economy. Please join us in supporting this critical investment in L.A. County's future prosperity.

Sincerely,

John Calhoun

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Chair Louie and Members of the L.A. County Regional Planning Commission,

The Golden State Gateway Coalition advocates for strategic transportation infrastructure investment in northern Los Angeles County to promote sustainable economic growth in one of California's most dynamic regions.

Master-planned communities bring coordinated housing and transportation development that reduces sprawl and improves our regional connectivity. From the beginning, the Valencia by FivePoint project has placed a well-deserved emphasis on comprehensive transportation investments, plus a commitment to building a sustainable, net-zero GHG community. Ultimately, this development will consist of approximately 21,500 homes and millions of square feet of commercial, job-generating space making this a truly sustainable community.

These have included more than \$150 million in direct investments in local and regional traffic mitigation and transportation improvements, with additional investments also planned in the future. These include road widening, new signals and other upgrades at several key interchanges and intersections. FivePoint has also been instrumental in securing major funding for the long-term improvements to the 5 Freeway currently underway, working closely with the Golden State Gateway Coalition and its representatives from the Santa Clarita Valley, Antelope Valley, and L.A. County. These investments have alleviated congestion, supported regional commerce, and improved overall quality of life.

Given this success to date, we believe Valencia by FivePoint has earned support for its next phases. On behalf of the Golden State Gateway Coalition, we heartily recommend approval of the next phase of Valencia Commerce Center and Entrada South.

Sincerely,

John Musella
Executive Director, Golden State Gateway Coalition

**RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center
(Project 87-150)**

Dear Regional Planning Commissioners:

Our company is a licensed General Contractor and a member of the International Union of Operating Engineers Local 12 and Southern California District Council of Laborers of the Laborer's International Union of North America that has worked on the community development to date at Valencia by FivePoint's Mission Village project. The next phase of the Valencia by FivePoint community includes Entrada South and Valencia Commerce Center.

Pursuant the CFD Acquisition Agreement with Los Angeles County, prevailing wage is required for all contracts for construction of public improvements for horizontal infrastructure within the Project's Community Facilities District, which will ultimately account for hundreds of millions of dollars in public infrastructure work. We as contractors comply with these prevailing wage requirements.

The Project also advances California's climate leadership and protects the environment. Valencia by FivePoint is the only Net Zero Greenhouse Gas master planned community project of its kind under construction that implements a comprehensive Net Zero program approved by the California Air Resources Board and State resource officials. The Project is consistent with and implements the County's Housing Element and General Plan, and it is consistent with the region's Sustainable Communities Strategy.

The Project also includes extensive open space, a commitment to clean energy, zero-emission transportation investments, comprehensive bike and pedestrian trails, off-

site sustainability improvements in underserved communities, and scores of other features that protect the environment and advance health and wellness. Importantly, the Project also complies with California's stringent fire codes to promote comprehensive fire prevention and protection.

Mission Village has already been a powerful economic driver for our company, our employees and our community. We believe Entrada South and Valencia Commerce Center will be an even stronger catalyst to promote prosperity throughout this region.

In conclusion, we urge this Commission and the County's Board of Supervisors to approve this Project now so our employees can get to work and seize this extraordinary opportunity for us to keep working - to create jobs, urgently needed housing, and significant tax revenues for the region.

Sincerely,

Brian McCosker

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Regional Planning Commissioners:

As a business owner at Valencia Commerce Center (VCC) with two of our five locations in the Santa Clarita area, I am an enthusiastic supporter of FivePoint's proposal for the next phase of the Valencia by FivePoint community.

VCC is a flourishing commercial park in the Santa Clarita Valley that powers our local economy and provides a meaningful source of high-quality jobs, tax revenue, and overall economic vibrancy. FivePoint's proposal would advance VCC to near completion by adding up to 3.4 million additional square feet of commercial and industrial space, enlarging the positive impact of this thriving economic hub.

FivePoint is also seeking approval for Entrada South, a mixed-use neighborhood that will help address our regional housing crisis by providing more than 1,000 additional housing units, alongside community-serving retail and other amenities. Importantly, Valencia by FivePoint will continue to be a leader in environmental sustainability, preserving abundant open space while achieving net zero greenhouse gas emissions. LA North Studios is working with FivePoint to add electrical vehicle charging stations to one of our properties.

This is a well-balanced proposal that will strengthen all of L.A. County. Please join me in supporting this investment.

Sincerely,

John Prabhu
Manager

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Planning Commission,

On behalf the Los Angeles Business Council (LABC), a business research and advocacy organization representing more than 500 members across greater Los Angeles, I write in support of the Valencia by FivePoint community in the Santa Clarita Valley.

For more than 80 years, the LABC has harnessed the power of business, government, and community to promote progress in the Los Angeles region in the areas of transportation, housing, sustainability, and economic development. Today, our members represent business and civic leaders from all industry sectors who are focused on innovative public policy that strengthens our economy while improving quality of life for all of us.

From the beginning, LABC has been an avid supporter of the Valencia by FivePoint community. This forward-looking, master-planned community is “proof of concept” that, by harnessing well-designed solutions, we can tackle our urgent housing crisis while also protecting the environment and driving economic growth for Los Angeles County. To date, Valencia by FivePoint has created homes for more than 3,000 people, created thousands of jobs, and upheld its commitment to remain carbon-neutral while promoting sustainable mobility, protecting open space, and more.

We extend our enthusiastic support to the next phase of Valencia by FivePoint, Entrada South and the next phase of the Valencia Commerce Center. This new phase will add even more high-quality housing units at a variety of price points, helping to relieve L.A. County’s well-documented housing shortage. It will also add to a successful commercial

center that has already created high-paying, family-supporting jobs in a range of in-demand fields.

The full Valencia by FivePoint vision will create up to 21,000 homes and millions of square feet of commercial space, protect more than 10,000 acres as dedicated open space, continue promoting sustainable mobility, create 50 miles of hiking and biking trails, and remain fully carbon-neutral, thanks to a series of sustainability investments on-site, around L.A. County, and elsewhere in California. This is a winning vision for sustainable development in our region, and we're proud to offer our full support for Entrada South and Valencia Commerce Center.

Sincerely,

A handwritten signature in dark ink, reading "Mary Leslie". The script is fluid and cursive, with the first name "Mary" and last name "Leslie" clearly distinguishable.

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Chair Louie and Members of the L.A. County Regional Planning Commission,

The Los Angeles County Economic Development Corporation (LAEDC) is a nonprofit organization focused on equitable economic growth in the Los Angeles region. We advance key industries, provide business assistance, and collaborate with educational institutions to develop a robust workforce and support the continued growth of L.A. County.

The Valencia by FivePoint community addresses three of the County's most pressing challenges: our deep-seated housing shortage, our unsteady economy, and our effort to reduce climate change. At full buildout, the community will create up to 21,000 homes and generate thousands of quality, local jobs, and millions in tax revenue all while maintaining net-zero GHG emissions.

We recognize the benefits of FivePoint's proposed next phase, currently before L.A. County – Entrada South and continuation of Valencia Commerce Center. Entrada South will create more than 1,500 new homes along with new, community-serving retail space. We need more housing in our region to ensure we have adequate workforce housing, that is price obtainable. In addition, the next stage of the Valencia Commerce Center will support the economic growth of the Santa Clarita Valley and all of Los Angeles County by attracting more high-quality businesses to the already-successful business park.

The next phase of Valencia by FivePoint is an innovative and ambitious proposal with the potential to meaningfully advance the economy of L.A. County in a responsible and sustainable manner.

Thank you for your leadership and consideration.

Sincerely,

Stephen Cheung
President & CEO | Los Angeles County Economic Development Corporation (LAEDC)

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Members of the L.A. County Regional Planning Commission,

The Southern California Leadership Council (SCLC) respectfully submits this letter in support of the FivePoint proposals for Entrada South and Valencia Commerce Center. SCLC is a non-partisan, non-profit, public policy organization that provides leadership on major public policies and issues that are critical to the economic vitality, job growth, and quality of life in Southern California. Our Board brings together the experience and expertise of three former California governors (Pete Wilson, Gray Davis, and Arnold Schwarzenegger), a core group of elected leaders from Southern California's largest local government jurisdictions and four dozen presidents and CEOs of the region's largest companies and major public agencies.

SCLC is a regional organization that is concerned with the most important issues facing our region, including the current housing affordability crisis. Housing affordability has been one of our primary focus areas over the past five years due to its negative impacts on Southern California's economy, employment, and quality of life. Because our view is regional, we infrequently comment on individual development projects, but we have determined that Entrada South and the Valencia Commerce Center, as parts of the natural evolution of Valencia by FivePoint, are projects of regional significance, and we are therefore submitting this letter to voice our support for them.

Valencia by FivePoint has already done much to address our concerns about the housing crisis. It has created thousands of jobs and generated tremendous economic activity while providing homes for more than 3,000 residents in the Santa Clarita Valley. Importantly, it has achieved these important goals while offering homes that are within financial reach of many Southern California residents, remaining carbon-neutral, and maintaining a significant portion of its land as preserved and funded open space.

Long-term, Valencia by FivePoint will become even more regionally significant, providing over 21,000 homes, creating tens of thousands of construction and permanent jobs, and generating billions of dollars in economic activity. At the same time, two-thirds of its land – totaling 10,000 acres – will remain as protected open space in perpetuity. Its housing component is especially important in light of the fact that currently L.A. County has only achieved a mere 8% of its 2028 Regional Housing Needs Allocation goals, with only a little over four years left in the current RHNA cycle.

We therefore see Valencia by FivePoint, and with it Entrada South and Valencia Commerce Center, as a model for the sustainable new development and attainably priced housing that our region urgently needs. Because of this, we urge you to wholeheartedly support these two projects.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Lambros", with a stylized flourish at the end.

Richard Lambros

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Regional Planning Commissioners:

The Santa Clarita Valley Senior Center, operated by the Santa Clarita Valley Committee on Aging, has served older adults and their families in the Santa Clarita and Antelope Valleys for nearly 50 years. Each year, we provide a wide range of services — including nutrition, transportation, wellness programs, caregiver support, and adult day care — to over 10,000 seniors and their families who rely on us to help them live with dignity, independence, and connection.

FivePoint and its predecessor company, Newhall Land & Farming Company, have been generous supporters of the SCV Senior Center for more than 30 years. This includes supporting the development of our modern and beautiful new 30,000-square-foot building that opened in 2019 – whose courtyard is named in FivePoint’s honor.

FivePoint is a dedicated community partner, and we are pleased to support the next phase of Valencia by FivePoint. This phase includes Entrada South, a vibrant new residential neighborhood, that will deliver robust new housing options for the Santa Clarita Valley. Importantly, these include affordable housing units and may include homes reserved specifically for seniors – a much-needed component of a well-balanced community. Entrada South will also provide open space, parks, retail areas, and amenities for residents of all ages. This multi-generational community will strengthen connections within and between families, increasing quality of life for all.

The proposal also includes the next phase of the Valencia Commerce Center, which will create jobs and tax revenue that is necessary to support much-needed public services, including services for our seniors. We appreciate that Valencia is making these investments while

committing to net zero greenhouse gas emissions and zero-net energy building designs, helping to protect our atmosphere and environment for future generations.

FivePoint has become an inextricable part of the fabric of this community, through their dedication and generosity. For the reasons noted above, the Santa Clarita Valley Senior Center is proud to support Valencia by FivePoint's next phase: Entrada South and Valencia Commerce Center. Please join us in supporting this important plan.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Kevin MacDonald', with a long horizontal flourish extending to the right.

SUBJECT: Support for Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear Regional Planning Commission,

On behalf of the Santa Clarita Valley Economic Development Corporation (SCVEDC), I am writing to express our strong support for FivePoint's proposed Entrada South and Valencia Commerce Center projects, two transformative developments that are essential to the continued economic and community growth of the Santa Clarita Valley.

SCVEDC's mission is to foster a thriving economic environment for our region, which is home to the third-largest city in Los Angeles County and one of its most dynamic growth areas. Over the past 15 years, our organization has supported more than 644 companies, facilitated the creation and retention of over 23,000 jobs, and welcomed over 174 new businesses to the area.

FivePoint has been a long-standing and trusted partner in this progress. The company's sustained investment in our region, particularly through the visionary Valencia community has significantly contributed to job creation, economic resilience, and the attraction of new industries to the Santa Clarita Valley.

The Entrada South and Valencia Commerce Center projects represent a critical next step. Entrada South will bring a thoughtfully designed, mixed-use residential community that supports workforce housing, while the continued expansion of the Valencia Commerce Center enhances a major employment hub that already supports a wide range of industries, including aerospace, life sciences, healthcare, and financial services. These projects help maintain a healthy jobs-housing balance that allows residents to live closer to where they work, reducing traffic, improving quality of life, and reinforcing the region's economic sustainability.

In addition to creating tens of thousands of permanent and construction jobs, these projects will generate significant tax revenue to support public services, infrastructure, and quality-of-life improvements for all Santa Clarita Valley residents. The proposed developments align with smart growth principles and ensure that our region remains competitive, innovative, and inclusive. FivePoint's ongoing investment in the Santa Clarita Valley is a vital driver of our regional success. On behalf of our organization and our 50-member board, I respectfully urge the Commission to approve this important proposal.

Thank you for your leadership and for your consideration. Should you have any questions or need further information, please feel free to contact us directly.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ondre Seltzer', with a stylized, cursive script.

Ondre Seltzer

RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center (Project 87-150)

Dear L.A. County Regional Planning Commissioners,

As a business owner at Valencia Commerce Center (VCC) and a member of the VCC Association, I am an enthusiastic supporter of FivePoint's proposal for the next phase of the Valencia by FivePoint community.

VCC is a flourishing commercial park in the Santa Clarita Valley that powers our local economy and provides a meaningful source of high-quality jobs, tax revenue, and overall economic vibrancy. FivePoint's proposal would advance VCC to near completion by adding up to 3.4 million additional square feet of commercial and industrial space, enlarging the positive impact of this thriving economic hub.

FivePoint is also seeking approval for Entrada South, a mixed-use neighborhood that will help address our regional housing crisis by providing more than 1,000 additional housing units, alongside community-serving retail and other amenities. Importantly, Valencia by FivePoint will continue to be a leader in environmental sustainability, preserving abundant open space while achieving net zero greenhouse gas emissions.

The proposed effort aligns with the County's values of diversity, equity, and sustainability, and I commend your commitment to creating vibrant and resilient communities for all county residents.

Sincerely,

A handwritten signature in blue ink, appearing to read "David Vanderhorst".

**RE: SUPPORT Entrada South (Project 00-210) and Valencia Commerce Center
(Project 87-150)**

Dear Regional Planning Commissioners:

Our company is a licensed General Contractor and is signatory to the Operating Engineers, Laborers International, and Teamsters Unions. Ward Corporation has worked on the community development to date at Valencia by FivePoint's Mission Village project. The next phase of the Valencia by FivePoint community includes Entrada South and Valencia Commerce Center.

Pursuant the CFD Acquisition Agreement with Los Angeles County, prevailing wage is required for all contracts for construction of public improvements for horizontal infrastructure within the Project's Community Facilities District, which will ultimately account for hundreds of millions of dollars in public infrastructure work. We as contractors comply with these prevailing wage requirements.

The Project also advances California's climate leadership and protects the environment. Valencia by FivePoint is the only Net Zero Greenhouse Gas master planned community project of its kind under construction that implements a comprehensive Net Zero program approved by the California Air Resources Board and State resource officials. The Project is consistent with and implements the County's Housing Element and General Plan, and it is consistent with the region's Sustainable Communities Strategy.

The Project also includes extensive open space, a commitment to clean energy, zero-emission transportation investments, comprehensive bike and pedestrian trails, off-site sustainability improvements in underserved communities, and scores of other features that protect the environment and advance health and wellness. Importantly, the

Project also complies with California's stringent fire codes to promote comprehensive fire prevention and protection.

Mission Village has already been a powerful economic driver for our company, our employees and our community. We believe Entrada South and Valencia Commerce Center will be an even stronger catalyst to promote prosperity throughout this region.

In conclusion, we urge this Commission and the County's Board of Supervisors to approve this Project now so our employees can get to work and seize this extraordinary opportunity for us to keep working - to create jobs, urgently needed housing, and significant tax revenues for the region.

Sincerely,

Michael Ward

Vice President

Ward Corporation
