

This table should be used as a part of all Biological Inventories and Biological Assessments prepared for projects in the Santa Monica Mountains Coastal Zone

Habitat category	On-site impacts ⁱ [acres or sf ⁱⁱ]					Off-site impacts ⁱⁱⁱ [acres or sf]		
	Construction	Fuel-modification zones			Total	Construction	New brush thinning	Total
		A	B	C				
H1								
H2				5,289	5,289		20,467	25,756
H2HS								
H3	3,422	16,345	40,996	41,323	102,086		86,795	188,881
Total	3,422	16,345	40,996	46,612	107,375		107,262	214,637

*Area units are square feet

ⁱ Assess using the ground-truthed habitat mapping as determined in the biological assessment.

ⁱⁱ Calculate area to the nearest 0.01 acre or to square feet if area is too small to be resolved to that degree (i.e., less than 218 sf).

ⁱⁱⁱ Assess using the adopted LCP mapping as presented on County Planning's GIS-NET.New
